2.1.7 Leave Policies	21
2.1.8 Financial and other benefits.....	24
2.1.9 Other HR related provision.....	28
CHAPTER 3 INSTITUTE’S OTHER POLICIES	29
3.1 Diversity	29
3.2 Non-Discrimination.....	29
3.2.1 Misconduct in research, authorship and plagiarism.....	29
3.3 Harassment at work place Policy	30
3.4 Intellectual Property	30
3.4.1 Copyright Law Compliance.....	30
3.5 Grievances Policy.....	31
3.6 Conflict of Interest.....	31
CHAPTER 4 THE FACULTY STRUCTURE.....	32
4.1 Faculty Governance.....	32

4.1.1	Deans/HoD.....	32
4.2	Faculties of the Institute	32
4.2.1	Computer Science and Engineering.....	32
4.2.2	Electrical Engineering.....	33
4.2.3	Engineering Sciences	34
4.2.4	Materials and Chemical Engineering.....	34
4.2.5	Mechanical Engineering	35
4.2.6	Department of Management Sciences	35
4.2.7	Department of Civil Engineering.....	36
CHAPTER 5	THE FACULTY POLICIES AND PROCEDURES	37
5.1	Academic Calendar	37
5.1.1	Semester.....	37
5.2	Academic Load.....	37
5.2.1	Lectures.....	38
5.3	Course Development	38
5.4	Course File	38
5.5	Code of Conduct.....	39
5.6	Classroom conduct	39
5.7	Academic Freedom.....	39
5.8	Academic Prohibition and Suspension.....	40
5.9	Grading System	40
5.10	Academic Integrity	42
5.11	Outcome Based Education.....	42
5.12	Office Hours	43
5.13	On campus duty days.....	43
5.14	Holidays.....	43
5.15	Academic advertising	43
5.16	Students' Registration number and Email.....	44
5.17	Allowable maximum (student) semester hour load	44
5.18	Audit a course.....	44
5.19	Faculty Transfer.....	44
5.20	Withdrawal from GIK Institute	44
5.21	Class Lists.....	44
5.22	Class Scheduling.....	45
5.23	Classroom Change Requests	45
5.24	Final examination schedule	45
5.25	Existing Program and Course Review.....	45
CHAPTER 6	SCHOLARSHIPS & RESEARCH	46
6.1	General Principles	46
6.2	Scholarship and research support for faculty	46
6.3	Norms Policies and regulations guiding scholarship and research	47
6.4	Collaborative Research.....	47
6.5	Graduate Studies.....	47
6.6	Consulting work/ work outside the Institute	47
6.7	Institutional support for Research & Development.....	48

CHAPTER 7	STUDENTS RELATED POLICIES.....	49
7.1	Student Privacy.....	49
7.2	Smoking, Alcohol and Drug Abuse	49
7.3	Abuse of Self or Others	49
7.4	Dishonesty in Academic Matters	50
7.5	Firearms Policy.....	50
7.6	Student-Faculty Relation.....	50
7.7	Student Scholarships	51
CHAPTER 8	ADMINISTRATIVE SUPPORT AND SERVICES.....	52
8.1	Information Technology.....	52
8.1.1	Web Portal	53
8.2	Online Learning system.....	53
8.3	Human Resources Department.....	54
8.4	Bookstore.....	55
8.5	Tuck Shops.....	55
8.6	Food and dining.....	55
8.7	Bank.....	56
8.8	Service Center	56
8.9	Lost and Found.....	56
8.10	Faculty Club	57
8.11	Maintenance.....	57
8.12	Mosques.....	57
8.13	Sports and Recreational Resources.....	57
8.14	Public Relations Department.....	58
8.15	Marketing Department.....	58
8.16	Medical Center	58
8.16.1	Management of COVID-19	59
8.17	GIK College.....	59
8.18	Transportation.....	59
8.19	Safety and Security.....	59

PREFACE

A faculty hand book is an important document, created by most educational institutions to communicate and share basic organization, faculty and employee related policies contained therein. The handbooks aim at creating better understanding, remove confusions, if any, help solve employee's problems and could help new employees feel comfortable about their new environments of the Institute by learning about its history, vision, mission, goals, and core values etc. It can increase employee engagement and loyalty for the institutions they serve. A typical handbook contains general information about the institutions different policies, discipline and other regulations and procedures etc., human resources related legal and other information, processes and procedures.

The matters including appointments, promotion, the award of tenure, salary and its increases, and related conditions of employment for faculty and employee's rights and obligations related to their employment, perks, benefits and responsibilities; are all generally part of a handbook and serve as branding guide also of the universities.

In addition, it covers the framework for employee behavior, development, working hours, leave and vacations, employee resignation and terminations etc. and above all, exhibit the values to the employees that motivate them to work and contribute. Updating and revision remains a normal feature. This handbook includes approved policies by the time of finalizing this document. In case, any policy is modified or changed after the publishing of this handbook, the newer policy will stand applicable.

GIK's Faculty Handbook has been prepared with these basic ideas in mind. It is believed that it will serve as information communication vehicle to facilitate and integrate the faculty, stakeholders and other employees. We express our happiness that faculty members and other employees are part of Institute and take this opportunity to acknowledge their outstanding services.

GIK Institute, Topi, Swabi.
October, 2020

THE TEAM

Prof. Dr. Jameel-Un Nabi, Pro-Rector (Academic)	Convener
Dr. Muhammad Sabir, HoD, DMgS	Incharge
Dr. Zia ul Haq Abbas, Dean, FEE	Member
Dr. Muhammad Imran Khan, Dean Student Affairs	Member
Dr. Khalid Rehman, Associate Professor, FME	Member
Dr. Khurram Imran, Assistant Professor, FMCE	Member
Mr. Shahryar Pervaiz, Lecturer, FES	Member
Ms. Rizwana Kalsoom, Lecturer, FCSE	Member

Pre-print Review & Re-organization; Sardar Aminullah Khan, Pro-Rector (A&F)

DEFINITIONS

In this handbook, unless there is anything repugnant in the subject or context;

- a) Act means Ghulam Ishaq Khan (GIK) Institute of Engineering Sciences and Technology, Act, 1994 (Khyber Pakhtunkhwa Act No. III OF 1994).
- b) ‘**Advisory Board**’ means the Advisory Board of the Institute;
- c) ‘**Board**’ means the Board of Governors of the Institute;
- d) ‘**Chancellor**’ means the Chancellor of the Institute;
- e) ‘**Committee**’ means the Executive Committee of the Institute;
- f) ‘**Council**’ means the Governing Council of the Institute;
- g) ‘**Dean**’ means the Dean of a school, faculty or other teaching or research unit of the Institute;
- h) ‘**HoD**’ means Head of any Department of the Institute;
- i) ‘**Institute**’ means the Ghulam Ishaq Khan (GIK) Institute of Engineering Sciences and Technology;
- j) ‘**President**’ means the President of the Society;
- k) ‘**Pro-Rector**’ means the Pro-Rector of the Institute;
- l) ‘**Rector**’ means the Rector of the Institute;
- m) ‘**Regulations**’ means the Regulations framed under the Act;
- n) ‘**Rules**’ means the Rules framed under the Act;
- o) ‘**Society**’ means the Society for the Promotion of Engineering Sciences and Technology in Pakistan formed under the Societies Registration Act (XXI of 1860) (Registration No. 8768);
- p) ‘**Teachers**’ means the Professors, Associate Professors, Assistant Professors, Lecturers and Research Staff engaged by the Institute, or such other persons as may be recognized to be teachers by the Council;

Interpretation

In case of any question of interpretation of this Faculty Handbook, it will be referred to the Rector, who in consultation with the Governing Council, decide the matter. The interpretation agreed upon by the Council will be binding until such time the Board of Governors adopts the interpretation or gives its own final interpretation on the matter.

CHAPTER 1 THE GIK INSTITUTE

1.1 Introduction-Historical Perspective

The genesis of the Institute can be traced back to the early 50's when (late) Ghulam Ishaq Khan became acutely aware of Pakistan's dependence on foreign expertise and imported technology. Out of his frequent interaction with the foreign and local experts emerged the idea that a center of excellence in engineering sciences and production technology ought to be established in the country, a center whose standards of education are comparable to those of its counterparts in the advanced countries. The transformation of this idea into a practical proposition took place in December 1985 when the Benevolent Community Care and Infaq Foundation donated Rs. 50 million for setting up an Institute for the promotion of science and technology in Khyber Pakhtunkhwa province (erstwhile Northwest Frontier province (NWFP)).

A milestone in the evolution of the Institute was the registration in June 1988 of its parent body, namely, Society for the Promotion of Engineering Sciences and Technology in Pakistan (SOPREST). Mr. Ghulam Ishaq Khan (late), then the President of the country, was elected the President of the Society for life. Mr. H. U. Beg was appointed its honorary Executive Director. The task of conceiving and formulating the basic form and features of the Institute was entrusted to a group of eminent scientists and engineers. These professionals started the transformation of the dream into reality at a galloping pace. The civil works at the campus site were started in early 1990.

An interim office of the Institute was set up in August 1992 where senior professionals with outstanding backgrounds worked in a cohesive group to evolve the educational aims and philosophy of the Institute, its curricula and details of state-of-the-art equipment for its laboratories and workshops. The Ordinance of the Institute was promulgated by the Khyber Pakhtunkhwa Government (the NWFP Government) in March 1993 and the first batch of students entered its portals in October 1993, followed by an Act passed by the provincial assembly in July, 1994.

1.2 The Mission of GIK Institute

The Institute, under its Act, “provides for instruction and training in engineering sciences, technology and other allied disciplines, to print, publish and circulate periodicals, journals, magazines and books and disseminate scientific, technological and other related knowledge and information conducive to the attainment of any of the objectives of the Institute”. In this process, it can “promote contact and establish liaison with national and international universities, institutions and other research and development organizations within the country and abroad and make provisions for research, innovations, inventions, demonstrations and other services; all aimed at producing competent, imaginative, skilled and committed scientists and engineers.

The Institute imparts state-of-the art quality education and provides excellent teaching and research environment to produce graduates who later distinguish themselves by their professional competence, research, entrepreneurship, humanistic outlook, ethical rectitude, pragmatic approach to problem solving, managerial skills and ability to respond to the challenge of socio-economic development to serve as the vanguard of techno-industrial transformation of the society.

1.3 Organization & Management

1.3.1 Board of Governors

The organization of the Institute comprises President of the BOG, the Chancellor, Rector, Pro-Rectors and various Committees, Councils and Boards, discharging various functions under the Act. The overall control of the Institute has been vested in the General Council of the Society which functions as the Board of Governors of the Institute, enjoying various powers under the Act. Changes in the composition of the Board of Governors are also made on the recommendations of the General Council of the Society, from time to time. In addition, the Board has certain powers under section 14(3) of the GIK Act.

Without prejudice to the generality of the control of the Board, the general supervision and control of the affairs of the Institute shall vest in the Executive Committee of SOPREST. There is a Governing Council of the Institute that, subject to the general control of the Board of Governors and the Executive Committee, is executive body of the Institute and carries out day-to-day administration.

1.3.2 Authorities

1. The Chancellor

Under section 8 of the GIK Act, the President of the Islamic Republic of Pakistan shall be the Chancellor of the Institute. The Chancellor, when present, presides over the convocations of the Institute and, in his absence, a person nominated by him shall preside. Every proposal to confer an honorary degree shall be subject to confirmation by the Chancellor.

The Chancellor may cause an inspection or inquiry to be made in respect of any matter connected with the affairs of the Institute and may, when considered necessary, direct one or more persons or any organization to carry out inspection or inquiry and communicate his views with the General Council about its for necessary action.

2. The Rector

The Rector of the Institute is appointed by the Chancellor, in consultation with the Executive Committee of SOPREST for a fixed period on such terms and conditions as the Chancellor may

determine.

The Rector shall exercise general control and supervision over the affairs of Institute and shall ensure that the provisions of GIK Act, the regulations, the rules, policies and directions of the Board, the Committee and the Council are properly executed.

The Rector shall perform such other functions as may be entrusted to him by the Chancellor, the Board, the Committee or the Council and, in particular, shall:

- i. Submit plans or work and budget estimates of the Institute for recommendations of the Council and thereafter approval of the Committee.
- ii. Submit to the Committee, in accordance with the rules of procedures made by it, reports on the activities of the Institute and the execution of the plans work.
- iii. Provide necessary services to the Board and the Committee.

The Rector shall also have the power;

- i. To supervise the activities connected with the execution of programs for teachings, training, research, inventions, innovations, demonstrations, and other services.
- ii. To authorize expenditure provided for in the budget in accordance with the Rules.
- iii. to appoint, with the approval of the Committee, teachers and officers of the Institute and such other persons as may be necessary in accordance with the Rules so as to ensure the highest intellectual and moral qualities in the persons appointed
- iv. To re-appropriate funds within the approved budget.
- v. To sanction by re-appropriation an amount not exceeding a sum specified in the Rules and Regulations for an unforeseen item not provided for in the budget, and report it to the Committee.
- vi. To engage experts and consultants as may be required for the efficient and effective discharge of the functions of the Institute.
- vii. To constitute from amongst the officers and staff of the Institute such Committees, sub- Committees and Working Groups, as he may deem necessary.
- viii. To perform such other functions and exercise such other powers as may be entrusted or delegated to him by the Board or the Committee, from time to time.
- ix. To delegate any of his powers to appropriate levels or management subject to such conditions as he may deem fit to impose.

3. Pro-Rector Administration and Finance

Subject to the overall supervision of the Rector, the Pro-Rector Administration and Finance shall be Incharge of the administrative and financial affairs of the Institute and shall formulate and recommend to the committee or the Council for approval, rules and regulations relating to financial and administrative matters of the Institute.

The Pro-Rector Administration and Finance shall have the power:

- i. To liaise with government agencies, local bodies and authorities in connection with the financial and administrative affairs of the Institute
- ii. To administer the financial resources of the Institute
- iii. To administer the residences of the students, teachers and other staff members of the Institute
- iv. To supervise the extra-curricular and recreational activities of the Institute, including the matters of health and general welfare
- v. To maintain discipline in the Institute
- vi. To sanction expenditure provided for in the approved budget in accordance with the Rules
- vii. To appoint staff members of the Institute against vacant posts in accordance with the Rules and Regulations
- viii. To engage such casual workers, subject to budgetary provisions, as may be required from time to time.
- ix. To initiate disciplinary action against the employees of the Institute and impose penalties, including suspension, removal or dismissal from service in the Institute, in accordance with the Rules and Regulations.
- x. To perform such other functions and exercise such other powers as may be entrusted or delegated to him by the Board, the Committee, the Council, or the Rector; and to delegate any of his powers to appropriate levels of management, subject to such conditions as he may deem fit to impose.

4. Pro-Rector Academic

The Pro-Rector Academic shall be in charge of the academic affairs of the Institute and shall assist the Rector on matters relating to teaching, research, academic programs, extension and other development projects.

Subject to the overall supervision of the Rector, he shall formulate and recommend to the Committee or the Council for approval, rules and regulations relating to academic and research matters of the Institute.

The Pro-Rector Academic shall have the power:

- i. to liaise with universities, learning institutions, industry and other research organizations for apprenticeship and placement of students, training of teachers, and other academic and research activities
- ii. to submit recommendations to the council on the courses of study to be taught in the Institute giving due consideration to the advice of the Advisory Board and other bodies constituted for this purpose
- iii. to supervise the admission of students to the courses of studies and examinations of the

Institute

- iv. to coordinate the award of fellowship, stipends, medals, and prizes
- v. to arrange convocations
- vi. to make such arrangements for the scrutiny of papers, marks and results as he may consider necessary
- vii. to coordinate the teaching and research work of the schools or faculties of the Institute
- viii. to control and manage the publications and circulation of periodicals, magazines, journals and books and dissemination of scientific, technological and other related information
- ix. to perform such other functions and exercise such other powers as may be entrusted or delegated to him by the Board, the Committee, the Council or the Rector
- x. To delegate any of his powers to appropriate levels of management, subject to such conditions as he may deem fit to impose.

5. Councils, Boards and Committees

The GIK Act provides for constitution/appointment of different Councils, Boards and Committees under respective provisions, as given at **Annex-A**. The administrative and managerial functions of the Institute are supported by the work of different committees/councils established by the authorized bodies. They assist and advise the Institute in development of policies, development programs, research plans, and the faculty members in evaluation of effectiveness of various programs make recommendations for policy or other changes for consideration of the Institute.

A self-explanatory organogram for the Institute is provided at **Annex-B**.

CHAPTER 2 THE INSTITUTE’S POLICIES

2.1 HR Policies

HR policy is one of the important policies of the Institute and its salient features are stated below:

2.1.1 Faculty Appointments

1) Ranks

- i. Lecturer
- ii. Assistant Professor
- iii. Associate Professor
- iv. Professor
- v. Visiting faculty and scholars
- vi. Professor of Practice & Visiting Professor

2) Appointment Criteria

The terms and conditions of each appointment shall be stated in writing and given to faculty members before an appointment is made.

The criteria for each of new appointment is given as follows:

- | | |
|--------------------------------|--|
| a) Lecturer: | Master's degree in the relevant discipline from a recognized University abroad or acceptable equivalent. |
| b) Assistant Professor: | Ph.D. in the relevant discipline from a recognized university abroad or acceptable equivalent, preferably with some publications in refereed journals of international repute. The applicant should have demonstrated the capability to conduct independent and original research. |
| c) Associate Professor: | Ph.D. in the relevant discipline from a recognized university abroad or acceptable equivalent with five (5) years' service as Assistant Professor and six (6) research publications in ISI indexed journals. Two years industrial experience in an organization of international repute will be considered equivalent to one year of teaching and research experience in the university. The applicant should have demonstrated the capability to conduct independent and original research. |
| d) Professor: | Ph.D. in the relevant discipline from a recognized university abroad or acceptable equivalent with six (6) years' experience as Associate Professor and 12 research publications in ISI indexed journals or 11 |

years post Ph.D. teaching and research experience with 12 research publications in ISI indexed journals.

Two years' industrial experience in organizations of international repute will be considered equivalent to one year of teaching and research experience in the university.

Candidates for Professorship must have demonstrated that their research achievements have had a recognized impact on the advance of knowledge in their subject area(s).

e) Visiting Professor

Without bar an appointment of qualified person from within the country, efforts are also made to attract learned scholars from abroad as Visiting Professors with a view to building the international image of the institute and to ensuring liaison with the reputed teaching and research institutions abroad. Appointment of junior persons are avoided and a person who is otherwise eligible for appointment at least to the post of Associate Professor in the institute is appointed as a Visiting Professor by the competent authority on terms and conditions prescribed by the Institute.

Visiting Professor are appointed by the authority on recommendations of Pro-Rector (Academics)/ Dean of the respective Faculty.

f) Visiting Faculty and Scholars

As a matter of academic traditions and courtesy, the Institute (on its campus) welcomes scholars from other universities, for sabbatical or research opportunities, to spend a period of time on campus and to have an official affiliation with GIK Institute. When such affiliations take the form of Visiting Professorship (like an assistant, associate, and or full) appointment procedures follow regular administrative channels. Following guidelines are provided to make such appointments clear:

- i. Appointments: Suggested titles are Visiting Scholar, Visiting Research Scholar, Visiting Assistant Professor, Visiting Associate Professor or Visiting Professor in subject (Faculty): The Visitor or the Faculty should initiate the negotiations and work out the specified arrangements subject to approval by the Pro-Rector (A) and the issuance of a letter from the Rector.
- ii. Financial Arrangements: It is important to specify in writing as to what the financial arrangements under a visiting appointment are to be.
- iii. Foreign Visitors: Pro-Rector's (A) office should be involved from the very start in any plans for the appointments of foreign scholars.
- iv. Housing GIK generally provides housing facility, subject availability; but arrangements for visiting scholars are more often than not made by Facilitation department.

- v. Records: A simple record of appointments is to be kept centrally but is being computerized now.
- vi. Duration of appointment: Typically, such appointments should be considered on need basis but generally only when the stay is expected for a minimum period of one semester.
- vii. The policies and procedures of the Institute do not apply to visiting faculty/lecturers.

g) Honorary Appointments / Professor Emeritus:

The number of honorary appointments as Professor Emeritus is decided by the Institute depending upon excellence/expertise of a Professor. Institute confer status of an Emeritus Professorship to a Meritorious Professor retired in BPS 21 or BPS-22 (or equivalent) or retired with tenured status in recognition of his/her scholarship and service to university education who has served University or a constituent institute or a Centre of Excellence of the University for minimum period of 10 years as Professor.

Granting of Emeritus status is an honorary designation which generally does not entail any assigned duties, responsibilities, compensation, designated office space or staff but have privileges of the regular Faculty and academic staff as defined from time to time.

h) The Adjunct Faculty

The Adjunct Faculty is a part-time teaching appointment made on a course by course basis. Such Faculty are appointed on term contracts only. They carry out the duties directly associated with teaching and do not perform committee work nor assume other responsibilities required of the ranked Faculty.

i) Professor of Practice

GIK, realizing the versatile world of academics and professional services including research and development, has a policy of supporting the strength of the faculty by adding the Professor of Practice (POP) model in the Institute. POP is a non-tenured faculty position to be offered selectively to very limited number of highly qualified persons in the fields of academics, business, or holders of senior governmental/professional positions and having made major impacts in their respective fields.

This rank, a preferred mode across the globe where needed, has salient features and benefits such as providing flexibility to the institutions for appointing the expert practitioners without adversely affecting the existing ranks and file with increase in the academic freedom. The academic qualification of suitable candidates is adjusted by according lessor weightage to traditional minimum required degrees, publications and terms and conditions.

2.1.2 Payroll data

Salaries are normally paid on the last working day of each month. Payment is made either by check or is automatically deposited to the concerned faculty member's bank account. A payroll statement including details of all earnings and deductions is provided confidentially to each faculty member each month.

Along with the salary; faculty members are entitled to the following incentives:

- Free medical facilities for self, spouse and children at Campus Hospital (including outdoor specialized treatment) at a large panel of renowned hospitals;
- Subsidized schooling facility at GIK College;
- Contributory Provident Fund (CPF): 10% basic salary of the employee and equal contributed by the Institute after two years' continuous service and subject to the application by the concerned employee;
- Group Insurance Scheme.
- Free shuttle service from Topi to Islamabad/Peshawar on weekends.
- Provision of faculty club facilities at the campus.
- Provision of sports and gym facilities at the campus.
- Internet facilities for research and academic purposes.

2.1.3 Faculty Contracts

At each academic rank, an initial contract is awarded for a period of two years. This period also serves as a probationary period. The contracts are renewed for a further period (generally 3 and then for 5 years) based on the performance in the previous contract period(s) on case-to-case basis.

Termination: A faculty member may like to terminate the contract with the Institute at the end of his contract period.

Resignation: A faculty member may resign with a notice period of three months, or three-month' salary in lieu thereof.

Retirement: The retirement age for faculty members is 65 years of age.

2.1.4 Faculty promotion criteria

1) Promotion Criteria

For promotion to a higher rank, a candidate is evaluated in terms of effectiveness in three principal areas: (i) Teaching, (ii) Scholarship, research, and other creative work, and (iii) Service to the Institute, profession, and society. Not all faculty members are expected to excel in each of these

areas and distinction in either of the first two constitutes the main basis for appointments and promotions. Even though teaching may be more difficult to evaluate than scholarship, research, and creative work, it may not, however, be given secondary consideration in the overall evaluation.

(i) Teaching

Teaching is admittedly difficult to precisely define or assess. Teaching assessment commonly includes a faculty member's knowledge of his/her major field of study, awareness of developments in his/her major field of study, communication skills, ability to develop students' interest, ability to stimulate critical thinking in students, and motivate students to be able to apply the acquired knowledge to vital societal problems.

(ii) Scholarship, research, and other creative work

A faculty member's scholarship, research and other creative work should contribute to his/her particular field of interest and serves as an indication of professional competencies. The result of this kind of activity normally finds expression in publication and should be reflected in teaching.

(iii) Service to the Institute, profession, and society

This refers especially to service to GIK Institute's community in terms of committee assignments and also has a reference to service to one's profession, usually identified by time and effort devoted to professional organizations whether local, national, or international.

Once a year each faculty members must fill “Annual Academic Record” form. In this form, the faculty member must show clearly his/her annual performance. This form is countersigned by the dean and sent to the Pro-Rector for further action. This form also has the student’s evaluation section, which helps in monitoring the teaching capabilities of the teacher.

A generic procedure for the promotion process of the PhD faculty members is given as follows:

Assistant Professor to Associate Professor:

- Completion of 5 years of post-PhD teaching/research experience.
- Minimum 6 ISI indexed and Impact Factor research publications.
- A candidate may apply to the Rector for promotion through Dean/HoD.
- The Dean/HoD will forward the case through proper channel.
- Pro-Rector (A) selects three to five foreign referees for the evaluation of the scholarly work of the candidate. The names and contacts of the potential foreign referees are provided by the candidate.
- Upon receipt of at least two positive reports from the foreign referees, the Pro-Rector (A) forwards the case to the Rector’s office.

- The Rector will constitute a Promotion Committee, generally consisting of at least four members, i.e., The Rector, Pro-Rector (A), Pro-Rector (A & F), and the Dean/HoD of the candidate.
- The committee may recommend the case for promotion to SOPREST office which makes the final decision.

Associate Professor to Professor:

- Completion of 11 years of post-PhD teaching/research experience, out of which at least 6 years as Associate Professor.
- Minimum 12 ISI indexed and Impact Factor research publications.
- A candidate may apply to the Rector for promotion through Dean/HoD.
- The Dean/HoD will forward the case through proper channel
- Pro-Rector (A) selects three to five foreign referees for the evaluation of the scholarly work of the candidate. The names and contacts of the potential foreign referees are provided by the candidate.
- Upon receipt of at least two positive reports from the foreign referees, the Pro-Rector (A) forwards the case to the Rector's office.
- The Rector will constitute a Promotion Committee, generally consisting of at least four members, i.e., The Rector, Pro-Rector (A), Pro-Rector (A & F), and the Dean/HoD of the candidate.

The committee recommends the case for promotion to SOPREST which makes the final decision.

2) HEC Guidelines

The Institute will follow the HEC guidelines for promotion of Faculty Members with effect from 1.07.2021, in some case over & above the minimum eligibility criteria set by HEC for promotion of the faculty members, in order to maintain high standards of the Institute.

A revised criterion in comparison with existing criteria of the Institute is as follows:

Positon	GIK Existing Criteria	Revised criteria for adoption w.e.f. 1.7.2021
Associate Professor	Five (5) years' service as Assistant Professor with six (6) research publications in refereed journals of international repute. Candidate shall have rendered at least three years' service in the GIK Institute and remaining two years' experience should be teaching and research in a university	Five (5) years post PhD experience as Assistant Professor and ten (10) research publications with at-least 4 in the last 5 years, in ISI indexed impact factor journals. Two years industrial experience in an organization of international repute will be considered equivalent to one

	of international repute. Two years industrial experience in an organization of international repute will be considered equivalent to one year of teaching and research experience in the university. The applicant should have demonstrated the capability to conduct Independent and original research.	year of teaching and research experience in the university. The applicant should have demonstrated the capability to conduct Independent and original research.
Professor	Six (6) years' service as Associate Professor with twelve (12) research publications in refereed journals of international repute or acceptable designs or patents. Candidate shall have rendered four years' service in the GIK Institute and remaining two years experiences should be teaching and research in a university of international repute. Two years' industrial experience in an organization of international repute will be considered equivalent to one year of teaching and research experience in the university. Candidates for promotion to Professorship must have demonstrated that their research achievement have had a recognized impact on the advancement of knowledge in their subject area(s).	Six (6) years' service as Associate Professor and fifteen (15) research publications with at-least 5 in the last 5 years, in ISI indexed impact factor journals or 11 years post PhD teaching and research experience and fifteen (15) research publications with at-least 5, in the last 5 years in impact factor journals. Two years' industrial experience in an organization of international repute will be considered equivalent to one year of teaching and research experience in the university. Candidates for Professorship must have demonstrated that their research achievement have had a recognized impact on the advancement of knowledge in their subject area(s).

* Note: The other terms and conditions for promotion to the post of Associate Professor and Professor already set by the Institute will remain the same.

2.1.5 Professional development program for faculty

There is a very clearly defined faculty development program, in which lecturers can do PhD studies in the Institute or abroad to improve his/her qualification along with the job. The details of the selection process and benefits are given below:

Lecturers (GA-ship schemes): Graduate Engineer having First class F.Sc., BS (Eng.) and MS with minimum CGPA of 3/4 or equivalent and one publication in ISI indexed journal and five years' service in the Institute with three consecutive very good annual performance rating may be admitted on open merit based on test and interview with full waiver of tuition fee and single accommodation plus monthly amount as fixed by the Institute under GA-III Scheme.

Lecturer is required to assist the faculty in teaching and research activities for 20 hours per week in consideration of the stipend and is bond to serve the Institute for 3 years once, get graduate. Beside GA-III, Institute provides same kind of professional development track under Research Associate GA-IV scheme that though provide lesser monthly stipend (compare to GA-III) but had no binding to serve the Institute for 5 years after completion of PhD. Finally, GA-F scheme that has also similar to GA-III and GA-IV eligibility criteria, does offer full waiver of tuition fee and single accommodation, but no monthly stipend and the scholar has to take 20 hours of workload with no binding of serving the Institute after graduation.

2.1.6 Faculty appraisal

Performance of each faculty members is evaluated on their teaching effectiveness and other aspects on the prescribed faculty evaluation form by the Dean / Faculty HoDs concerned and countersigned by the Rector through Pro-Rector (Academic). ACRs forms of Deans / Faculty HoDs are filled by the Pro-Rector (Academic) and is countersigned by the Rector. Annual increment, inter alia, is paid on the annual rating as per performance evaluation report; provided that an employee shall have served continuously at least for a period of six months under the controlling officer. In case he has not served for more than six months under one reporting officer, his report will be initiated by the one under whom he has served the most period of the year. ACRs forms are at **Annex-C**.

All teaching faculty members will be evaluated on their teaching effectiveness; scholarship and creative work; and service to the College, advising, and student development as detailed in relevant sections of this Faculty Handbook. They also will be evaluated in the areas identified and agreed upon in their Statement of Professional Goals and Priorities. Non-teaching faculty will be evaluated in terms of their contracts.

The Institute enables the student evaluations of teaching performance by carrying out the process in the class rooms. It is documented and, wherever required, utilized for assessment of teaching quality and other purposes.

2.1.7 Leave Policies

1) Earned and Casual Leaves/Ordinary Leave

- As per leave policy, each employee is entitled to twelve (12) days casual leave in each financial year. He/ She may also avail of with prior permission of the competent authority, earned leave

to be accumulated at the rate of two days for each calendar month with a duty period not less than fifteen (15) days; Earned leave is usually granted during Summer months i.e. July-August and may be availed of within the contract period;

- The weekends can be prefixed or suffixed only and those falling during leave will form part of leave.
- There is no provision of medical leave in GIK Institute. It has to be sanctioned within the entitlement of Earned/ Casual Leave of an individual. Casual leave and Earned Leave cannot be combined.
- Substitute of the employee who is proceeding on leave, if required will be arranged by the department concerned.

2) Leave without pay

A regular faculty member is eligible for a leave of absence without pay subject to the following stipulations:

- i. Leave without pay will be granted only when (in the opinion of the Rector) such a leave will be of distinct benefit to the Institute as well as the concerned faculty member.
- ii. A leave without pay will not generally exceed the duration of one year.
- iii. Leave without pay will not normally be granted to GIK Institute faculty members wishing to accept a position at another institution or agency.
- iv. Before the leave without pay is approved, the concerned Dean must have agreed that the assignments usually carried out by the person requesting leave will be carried out satisfactorily by others.
- v. Request for leave of absence without pay should be submitted to the concerned Dean at least four months in advance of the date of the proposed beginning of the leave. The Dean forwards the request with his recommendations to the Pro-Rector (Academic) who then submits all pertinent material to the Rector along with his recommendations. The final decision is then made by the Rector.

3) Professional Leave

A faculty member's absence from the Institute to attend a professional meeting or to fulfill other professional obligations may be considered by the concerned Dean to be of sufficient importance to justify absence from the assigned duties. In any such instance, the request is made well in advance and must have the approval of the Dean. It is the faculty member's obligation to make suitable arrangements for covering the absence. The Dean should be prepared to report any faculty member absence from regularly assigned classes, scheduled examinations, posted office hours, and other assigned duties etc.

4) Sabbatical Leave

The main purpose of sabbatical leave is to encourage professional growth and increased competence among faculty members by subsidizing significant research or creative work. It is

understood that a sabbatical leave will be approved only with a clear understanding that the faculty member (at the completion of sabbatical) shall return and serve GIK Institute for a period of at least as long as the duration of the sabbatical leave.

Primary responsibility for determining the merit of proposed sabbatical leave from the point of view of the validity and probable value of leave to the faculty members and to the Institute lies in the Faculty and should be accomplished by a Committee. Deans will forward the recommendations through Pro-Rector (A) for consideration by the Governing Council. Once the Governing Council has approved the sabbatical leave, the application is forwarded to the Executive Committee for further consideration and approval. For PhD faculty, the Institute has a well-defined sabbatical leave policy, given in **Annex-D (1)**

Any contract faculty member with the rank of Assistant Professor or higher who has served full-time for six or more years at the Institute is eligible for consideration for a sabbatical leave.

6) Study Leave

Lecturers and Engineers/Programmers/Research Officers & equivalent who serve the institute for a minimum period of one year, may be allowed study leave for 2-3 years, with payment of half basic pay payable, on return/rejoining to avoid litigation & recovery issues at their respective pay scale for the period of their approved study leave period for MS/PhD abroad. In return they would be required to sign a Service Bond to serve the institute for 3-5 years as the case may be. In case he/she will not be paid any salary for the extended period. The number of such facilities may initially be limited to two each year. The service bond is to be guaranteed by his/her parents/guardians attested by the Judicial Magistrate. In case he/she does not return and fulfill the commitment, Institute will recover the amount so paid to him/her and other admin/legal expenses incurred.

Applicants who want to avail study leave without receipt of half basic pay, they may be allowed study leave without pay and allowances for 2-3 years for MS/PhD abroad subject to signing Service Bond for 2-3 years instead of 3-5, as the case may be.

7) Maternity Leave

With effect from 1st January, 2019, an employee shall be entitled to 60 days of paid maternity leave that can be taken either side of confinement, or split. The leave would be allowed to an employee who has completed at least one year of service in the institute a leaves with a maximum of two times during the entire service of an employee.

8) Research Leave

The Institute also encourages the faculty to proceed abroad during summer vacation for research work in the areas of their interest. For this purpose, besides grant of earned leave, there are allowed research leave on full pay up to a maximum of 36 days. All expenses on visa, travelling, boarding

& loading etc. are arranged/ borne by the concerned faculty member(s). Terms and Conditions of Research leave are given at **Annex-D (2)**

9) Extraordinary Leave

Extraordinary leave i.e. leave without pay and allowances may be granted on any ground by the authority at its discretion up to a maximum period of:

- (a) Two years to an employee with more than five years' continuous service in the Institute, and
- (b) One year to an employee with ore three years' continuous service in the Institute.

The period of extraordinary leave shall not count as service for the purpose of promotion, seniority and annual increment.

2.1.8 Financial and other benefits

1) Pay & Allowances

The Institute offers Pay & Allowances to the Faculty as per detail at **Annex-E**.

2) Annual Increment

Faculty Member are entitled to an annual increment at the discretion of the competent authority as per policy notified from time to time with effect from the first day of July each year and the first such increment shall, inter alia, be subject to completion of minimum six months' service in the Institute.

3) Travelling

Rate of daily allowance for food and eatables, room rent and traveling allowance which will be admissible to the officials while on admission related official duty within the country are as follows:

Category	Rate of Daily Allowance (when night stay is involved) Rs.	Rate of Room Rent/night on submission documents involved) Rs.	Travelling per KM when travelling in personal Car
Deans, Professors & Equivalent	Actual subject to maximum limit of Rs. 2,500/-	Actual subject to maximum of 4 times of DA/night	Rs. 13/Km
Associate Profess & Equivalent	Actual subject to maximum limit of Rs. 2,000/-	Actual subject to maximum of 4 times of DA/night	Rs. 13/Km

Assistant Professor, Director & Equivalent	Actual subject to maximum limit of Rs. 1,500/-	Actual subject to maximum of 4 times of DA/night	Rs. 13/Km
Lecturers, Deputy Directors & Equivalent	Actual subject to maximum limit of Rs. 1,000/-	Actual subject to maximum of 3 times of DA/night	Rs. 13/Km

The rates in the above table shall be reduced by 50% of the daily allowance when no night stay is involved.

Where an official stays during night in a residence at his own arrangement and does not want to submit actual Hotel bills and supporting documents of room rent, he shall be allowed 50% of the room rent admissible under para-2 above.

4) Research productivity allowance

(i) By the Institute

To encourage the Faculty to produce more quality impact factor research publications, the Institute awards research productivity allowance to its faculty members on following terms and conditions:

- the award shall be for research publications over and above the minimum number prescribed for promotion to the next cadre and maximum up to Rs. 50,000 per annum;
- the research work should have been carried out in the Institute by the faculty member in his area of interest;
- the award shall be admissible for new publications and not for the papers already published.

Rate of Research Productivity Allowance (RPA) with effect from 01.07.2018 is as follows:

- Sole Author -Rs. 20,000
- First Author -Rs. 15,000
- Second Author -Rs. 10,000

The maximum limit per year is Rs. 100,000

(ii) by donors (HEC, PSF etc.)

The faculty members of the Institute also submit their research proposals to different donor agencies. Many research proposals are accepted by the donor agencies like HEC, PSF etc. and Faculty members wins the projects for a particular period of time on a good research grant by the donors. Faculty members act as Principal Investigator or Co-Principal Investigators in these projects. The authorities of the Institute keep on encouraging such

faculty members on different important forums like Governing Council and Executive Committee.

5) **Research Awards**

The Institute offered Research Award on annual basis on the weightage of projects/research grants obtained (20%), published research papers in ISI journals with impact factor and GIK Institute name (50%), patent product (10%), PhD students produced (15%) and MS students produced (5%). The 1st prize for these purposes is Rs. 150,000/-, 2nd is Rs. 1, 00,000/- and the 3rd is Rs. 50,000/-

6) **Medical**

Faculty members are entitled to free medical treatment facilities at the Institute's Hospital for self and dependent family members, namely, spouse and children in addition to reimbursement in case of indoor patient in hospital on the panel of the Institute as per rules.

7) **Residences**

The Institute provides a Faculty Member an unfurnished family accommodation (at nominal house rent) at Campus subject to availability or single semi furnished accommodation in a shared house on Campus, as required. Full amount of house rent is deducted for family accommodation and 25% of the house rent is deducted for single accommodation.

8) **Supervision of thesis**

The Institute also compensates faculty members for supervising thesis of MS and PhD students in addition to other financial benefits. Faculty members are entitled for cash awards as per rules on supervision of MS and PhD thesis on terms and conditions as mentioned in **Annex-F**.

9) **Remuneration of external examiners in foreign reviewers**

Beside compensation to the Internal Faculty members for supervising MS and PhD theses, the Institute also compensate external examiners who visit the Institute to evaluate theses as per following details:

External Examiner	Revised Remuneration (each)	Other facilities
MS thesis defense examination	Rs.10,000/-	His / Her own transport. In case he / she avail Institute's transport facility, transport charges will be deducted from the remuneration.
PhD thesis defense examinations	Rs.20,000/-	His / Her own transport. In case he / she avail Institute's transport facility, transport charges will be deducted from the remuneration.
Foreign evaluator for PhD studies	US\$400	-

10) Incentive Scheme

Faculty members are also awarded annual incentive scheme on the basis of the annual performance mainly in research contribution and GIK professional education. Faculty members, for this incentive, are evaluated by a specially constituted Committee assigned this task, on the basis of different factors and assigned weightage accordingly. Total amount of the prize is Rs.100, 000 (Rs.60, 000 as 1st Prize and Rs.40, 000 as 2nd Prize, applicable to lecturer and above.

11) Conducting Training, Short courses, Workshop and Seminars

GIK Institute has a strong resource bank of manpower, dominated by PhDs in several disciplines/ technologies who are involved in teaching and research. This resource is quite effectively utilized to impart latest knowledge to the practicing professionals through short courses, workshops and seminars. The state of art infrastructure of GIK Institute's laboratories is used to compliment these activities by offering specialized hands-on training.

Pakistan Engineering Council (PEC), the regulatory body for engineers, has made earning of credit points through CPD activities as mandatory requirement for issuance and renewal of license for professional engineers and registered engineers. The current strength of such engineers registered with PEC is above 80,000 which indicate the volume of CPD workload to be undertaken by resource centers such as GIK Institute. Therefore, GIK Institute has set a policy to define terms and conditions to conduct short courses/workshops/seminars by the Faculty members. The policy is given at **Annex-G**.

12) Group Insurance

Those faculty members who have not reached age of superannuation are eligible to benefit from group insurance scheme. Approved category-wise groups of sum assured are as follows:

Group	Category	Sum assured Rs.
Group-I	Rector, Pro-Rectors, Professors, Associate Professors, Directors and equivalent	Rs. 2,000,000
Group-II	Assistant Professor, Lecturer, Deputy Director and Security Staff	Rs. 1,500,000
Group-III	Engineers, Assistant Directors, Admin Officers and below	Rs. 1,000,000

Faculty members are entitled to the benefit of Group Insurance in accordance with the Rules.

13) Provident Fund

Faculty members are entitled to become member of the Contributory Provident fund on completion of two years' continuous service in the Institute, in accordance with the Rules which is 10 percent of basic pay to be contributed by the Institute and 10 percent by the faculty member.

14) Direct and indirect benefits

(i) Visa fee reimbursement

In accordance with the decision of the Executive Committee in its meeting held on 14.4.2006, the faculty appointed directly from abroad by the Institute are being allowed for reimbursement of actual visa fee for self and family members as an incentive once at the time of joining the Institute and then on renewal of contract.

(ii) Traveling & Baggage allowance:

Foreign Faculty members are entitled to air fare (economy class) for self, wife and up to two children from the nearest airport (abroad) to Islamabad, Pakistan.

They are also entitled to re-imbursement of actual fare for un-accompanied baggage up-to a maximum of US\$1,000/- subject to production of actual vouchers/bills on joining the Institute;

2.1.9 Other HR related provision

(i) Training and Development

In order to ensure optimum use of the human and material resources of the Institute, the authority may, at its discretion, send a faculty member for training or participation in conference etc. if:

- a) He is the first or second author of a paper based on research work done in the Institute and is required to present the same;
- b) He is required to get specialized training on any equipment as a part of the purchase contract and the cost of such training is included in the price of the equipment;
- c) He is invited to chair the inaugural session of a conference, workshop, seminar or symposium etc.
- d) His participation in a conference or training is required as a nominee or representative of the Government of Pakistan;
- e) His participation in a Conference or training is a part of any collaborative research project; and
- f) He is invited by any international agency or organizer of the conference, seminar, training or workshop etc.

Provided that the sponsorship by the Institute shall be restricted to cases falling under section (a) and (b) only;

Provided further that an employee may be sent for training or participation in a seminar, conference, workshop or symposium under section (a) and (b) once after two years.

CHAPTER 3 INSTITUTE’S OTHER POLICIES

3.1 Diversity

GIK Institute welcomes, encourages, and duly supports the individuals who are desirous of contributing to and benefit from the Institute’s missions of teaching, research and innovation in a pluralistic culture and community comprising faculty, students, and staff representing different regions of the country. The diversity is its pride and thus enables creation of leaders for the next generation in a wide range of academic environment.

The success of the GIK Institute has always been the enabling environment that fosters vigorous thought, intellectual creativity and encouragement of exchange of diverse ideas that ultimately lead all-encompassing personal development as well accomplishment of the Institute’s mission. Furthermore, the GIK Institute seeks to provide a setting that respects the contributions of all the individuals composing its community, that encourages intellectual and personal development, and that promotes free exchange of ideas.

3.2 Non-Discrimination

Since GIK Institute is a diverse community of and for scholars, it requires an environment of trust and openness where productive work, teaching, and learning can successfully thrive. For this purpose, the Institute has a thoroughly merit-based culture. Be it, students or faculty, there is no discrimination of any kind on the basis of race, gender or ethnicity.

3.2.1 Misconduct in research, authorship and plagiarism

The definition of misconduct and plagiarism in research is as per HEC guidelines. Plagiarism is defined as “taking and using the thoughts, writings, and inventions of another person as one’s own”. These acts include but are not limited to the following:

- i. Verbatim copying, near-verbatim copying, or purposely paraphrasing portions of another author's paper or unpublished report without citing the exact reference.
- ii. Copying elements of another author's paper, such as equations or illustrations that are not common knowledge, or copying or purposely paraphrasing sentences without citing the source.
- iii. Verbatim copying portions of another author's paper or from reports by citing but not clearly differentiating what text has been copied (e.g. not applying quotation marks correctly) and /or not citing the source correctly.
- iv. The unacknowledged use of computer programs, mathematical/computer models/ algorithms, computer software in all forms, macros, spreadsheets, web pages, databases, mathematical deviations and calculations, designs / models / displays of any sort, diagrams, graphs, tables, drawings, works of art of any sort, fine art pieces or artifacts,

digital images, computer-aided design drawings, GIS files, photographs, maps, music / composition of any sort, posters, presentations and tracing.

- v. Self-plagiarism that is, the verbatim or near-verbatim reuse of significant portions of one's own copyrighted work without citing the original source.

The Institute ensures that it is the responsibility of each author, including the co-authors, to ensure that papers submitted by its faculty for publication attain the highest ethical standards with respect to plagiarism per HEC's plagiarism policy. The Institute fully follows the guidelines and Higher Education Commission's Plagiarism policy. Research works (such as thesis, research papers, Final year projects, semester project reports etc.) are checked through HEC provided "Turnitin" resources. In order to educate the new faculty members and for consistent practices of the HEC plagiarism policies, an HEC developed "guide" for reading the "Turnitin" output is enclosed in **Annex-H**.

3.3 Harassment at work place Policy

Any conduct by physical, verbal, graphic, written, or electronic means that is sufficiently severe, pervasive or persistent so as to threaten an individual or limit the individual's ability to work, study or participate in the activities of the Institute is prohibited. The Institute has zero tolerance policy for sexual harassment. GIK Institute complies with Higher Education Commission and Government Pakistan policies on the subject. A policy has been developed and is appended at **Annex-I**.

3.4 Intellectual Property

Considering the importance of the intellectual property rights and signing of agreements with difference universities and organizations and domestic/other policies and obligations on the subject, an Institute level committee has been constituted that is working on drafting Intellectual property policy for the Institute. The policy, once finalized and approved by the competent authority, will be later added to the handbook.

3.4.1 Copyright Law Compliance

The Institute encourages the faculty and staff to conduct the creative and innovative works with exclusive rights but they shall conduct their activities including any research or academic/writing activities, inventions or to create, produce or otherwise generate works, instructional materials or products which are copyrightable or patentable in such a way that they are covered and requirements of the copyright laws and regulations are met.

3.5 Grievances Policy

The Institute has constituted a Grievances Committee to develop policies to ensure fair and transparent treatment of all staff members across all faculties and departments. Composition of the concerned committee and its ToRs are enclosed as **Annex-J**.

3.6 Conflict of Interest

As an employer, the Institute starts from a position of trusting the professionalism of the staff it employs, and this trust underlies any attempt to handle questions which raise potential conflicts of interest. Yet the damage to the reputation of individuals and the Institute caused by conflict of interest could be considerable, e.g. where the press cast doubt on the validity of an academic's research findings owing to the academic being discovered to have had a financial interest with the sponsor. In order to protect individual staff members and the Institute from compromise, it is both necessary and helpful to settle a policy to deal with conflict of interest (under approval). An Institute level committee is actively working on drafting policies related to this important matter. The committee's composition and its ToRs are enclosed as **Annex-K**.

CHAPTER 4 THE FACULTY STRUCTURE

4.1 Faculty Governance

4.1.1 Deans/HoD

Each faculty/department shall be headed by a Dean/HoD who shall be appointed for a fixed/extendable period by the Executive Committee. Subject to the overall supervision of the Rector, each Dean/HoD shall have the power:

- 1) to ensure proper implementation of the Rules and Regulations relating to his school or faculty
- 2) to regulate the conduct and discipline of the students of his school or faculty and impose penalties, including cancellation of the enrollment of the students
- 3) to coordinate, advise and liaise with the Advisory Board, Pro-Rector Academic, other academic authorities and Pro-Rector (Administration and Finance) for teaching, research, extension, development works and administrative matter
- 4) to present candidates for admission to degrees, except honorary degrees, in the course falling within the purview of his school or faculty
- 5) to appoint examiners for all the examinations of his respective school or faculty
- 6) to direct teachers, students and staff members of his school or faculty to take up such assignments in the connection with teaching and research as he may consider appropriate
- 7) to nominate teachers, students and staff members of his school or faculty for training, fellowships, scholarships and other academic distinctions
- 8) to perform such other duties and exercise such other powers as may be assigned to, or vested in, him by the Board, the Committee, the Council or the Rector.

4.2 Faculties of the Institute

4.2.1 Computer Science and Engineering

The Faculty of Computer Science and Engineering endeavors to produce competent scientists and engineers who can play a productive role both in the application and research areas of computing. The faculty uses modern technologies to enhance the learning capabilities of the students and to provide them with a stimulating and challenging environment. Emphasis is put on the practical applications of computer systems to the software and hardware needs of the global industry in general and Pakistani industry in particular. The alumnus of the faculty is placed in reputed national and international organizations including Microsoft Corporation, Google Inc., IBM, and Amazon.com. The Faculty of Computer Science and Engineering offers following degree programs:

- Bachelor of Science (BS) in Computer Engineering

- Bachelor of Science (BS) in Computer Science
- Master of Science (MS) in Computer Science
- Doctor of Philosophy (Ph.D.) in Computer Science

The following are the thrust area in the Faculty of Computer Science and Engineering:

- Artificial Intelligence and Robotics
- Computational Theory
- High-Performance Computing & Data Analytics
- Machine Learning and Data Mining
- Network Communications and Distributed Systems
- Signal and Image Processing
- Software Engineering

The BS degree by this discipline punctuated by exhaustive coursework and research in modern fields of computer engineering, computer sciences and computer system engineering etc., the Institute takes the graduate and MS/PHDs to next step towards becoming one of the next generation of global tech leaders for working in Pakistan and around the world, conducting diverse work in scientific research, business, industry and in many more areas.

4.2.2 Electrical Engineering

Faculty of Electrical Engineering designs, reviews and updates curriculum and offers high-quality courses aimed at individuals who can amicably meet the emerging challenges in this field. The program of studies enables them to comprehend the team of future young engineers and to realize their innovative ideas. The Faculty also provides the students with the opportunity to learn as to how research carried out by the faculty members is transformed into education and its outcomes.

It offers four-year BS degree program in Electrical Engineering with following specializations:

- Electrical Engineering
- Power Engineering

This faculty also offers MS and PhD programs in Electronic Engineering. The following are the thrust areas in the Faculty of Electrical Engineering:

- Communication and Digital Signal Processing
- Microelectronics and ASIC Design
- Electric Power and Control Systems

4.2.3 Engineering Sciences

The Faculty of Engineering Sciences offers the holistic perspective of the fundamental sciences and provides opportunities to integrate the systems from different disciplines. The courses provide a high quality and broad-based coverage of multi-disciplinary engineering using Mathematics, Physics, Computer Science and Engineering to conduct research and design innovative engineering solution. The course is a peculiarity of GIK and offers excellent job opportunities in the industrial sector and R&D organization providing a launching platform to conduct graduate studies in the globally emerging field of Engineering Sciences.

The Faculty of Engineering Sciences offers following degree programs:

- Bachelor of Science (BS) in Engineering Sciences
- Master of Science (MS) in Mathematics
- Master of Science (MS) in Applied Physics
- Doctor of Philosophy (Ph.D.) in Mathematics
- Doctor of Philosophy (Ph.D.) in Applied Physics

4.2.4 Materials and Chemical Engineering

The Faculty of Materials and Chemical Engineering contains two segments, i.e. Department of Material Science and Engineering and Department of Chemical Engineering.

The curriculum of the faculty aims at producing multi-dimensional engineers. It provides a broad range of fundamental courses at the earlier stages and progressively leads the students to areas of their specialization. It includes the principles that govern the properties of metals, polymers, ceramics and composites, and the whole range of technologies that produce these materials and Nano-materials.

This faculty offers BS, MS and PhD programs in materials and chemical engineering. This faculty cuts through the following areas:

- Materials Processing, Manufacturing and Characterization
- Nanotechnology and Nano Materials
- Ceramics, Polymers and Composites
- Surface Engineering and Coating Technology
- Computational Materials Science
- Corrosion and Oxidation
- Process & equipment design
- Fluid handling and thermodynamic behavior
- Reaction engineering
- Transport processes

- Modeling and simulation

4.2.5 Mechanical Engineering

Faculty of Mechanical Engineering aspires to produce technically sound and professionally mature Mechanical Engineers to cater our National needs in the 21st century. The Faculty of Mechanical Engineering at GIK has a well-balanced and modern curricula designed both for the professional and the R&D / research engineer, drawing on all classical disciplines such as mechanics and materials, drawing/drafting, thermal and fluid sciences, design and control. Curricula also reflect the latest advances in Finite Element Methods, Computational Fluid Dynamics, Computer Aided Design and Drafting (CADD), Numerical Control Machines and Energy Management. Modern labs, workshops and demonstration facilities complement the futuristic curricula. Anticipating the technological scenario of the 21st century, the faculty provides an enjoyable and exciting academic experience.

The faculty offers BS, MS, and PhD programs in the following programs:

- Design and Manufacturing
- System Dynamics and Control
- Thermo-fluids
- Simulation and Modeling

4.2.6 Department of Management Sciences

The Department of Management Sciences is a comparatively a new discipline of the Institute and a hub for exploring business models from a societal and economic perspective, with particular emphasis on national, regional and international Supply Chain Management systems and innovative entrepreneurial models in order to enable students to become pioneering icons in the corporate world. The Department of Management Sciences is also unique in the sense that it equips engineering graduates with the management skills and business ethics needed to deliver engineering leadership in today's multi-disciplinary business environment.

This department offers BS and MS programs in management sciences that packs a substantial wallop in the following areas:

- Bachelor of Management Science (BS)
- MS Engineering Management (MEM)
- Masters of Business Administration (MBA)

4.2.7 Department of Civil Engineering

The evergreen field of Civil Engineering has always been a necessity for the people dwelling all around the globe. The increase in population calls for more structural construction but lesser vegetative and environmental destruction. Be it water sanitation, building construction, traveling through canyons, over, under and around the mountains; Civil Engineering never ceases to be an essential part of it.

Being a multi-dimensional field, the customary unidirectional approach towards its single portion is an injustice to this discipline. GIK wishes to address this issue and access all the dimensions of the field by introducing the program of Civil Engineering in 2018. The initiation of this program will also train its graduates to participate effectively in the development of Pakistan by getting involved in multiple projects under CPEC and other platforms.

The department aims to help the students to gain a practical understanding of the theoretical knowledge obtained in the class by applying them in the department's most modern and immaculately established laboratories. The campus of GIK Institute provides necessary field area for understanding the application, and integration of field and laboratory outcomes.

This department offers degree program in Bachelor of Civil Engineering and contemplates to start the MS programs also so that the students are equipped to play a vital role in the sustainable development of the society through this important discipline.

CHAPTER 5 THE FACULTY POLICIES AND PROCEDURES

5.1 Academic Calendar

GIK Institute follows a traditional fall and spring semester system during an academic year. Summer school is also offered to facilitate students lagging behind their batch mates. The updated versions of undergraduate and graduate academic calendar are available at GIK's official website for any further information.

5.1.1 Semester

The Institute follows the semester system and an academic year comprises three regular semesters (Fall and Spring) and a Summer School. The duration of a regular semester is fifteen weeks of teaching followed by one week of final Examinations while that of the summer is eight weeks of teaching followed by one week for Examinations. Normally, there is a break of one week after eight weeks of teaching during a regular semester. The Academic Calendar is circulated by the office of the Pro-Rector (Academic) that gives the exact dates for the start of the semester, breaks etc.

The Academic Calendar may be collected from the office or downloaded from the Institute's website. A faculty member, on leave during the end semester break or summer, is expected to be present on the Campus at least one week before the commencement of the semester in order to prepare course outline and relevant materials, etc. It is normally before start of semester that the students could get a copy of the timetable for the classes.

5.2 Academic Load

The term academic load describes the sum of all officially recognized GIK Institute duties carried out by an individual faculty member at any given time. The academic load in a regular semester includes the teaching of scheduled classes (teaching load) along with research, committee assignments, student advancement, supervision of MS thesis and PhD dissertations, and other assigned administrative and supervisory duties. Additional one course to be taught in the semester in which no research is carried out.

The normal teaching load per regular semester excluding research and committee work is nine credit hours. An advanced approval of the Pro-Rector (Academic) shall be sought in all cases when a full-time faculty member is proposed to be assigned a semester teaching load of less than nine credit hours. A reduction in teaching load below six credit hours shall be granted only with advanced approval of the Rector.

5.2.1 Lectures

Each lecture hour is of fifty minutes' duration. The timetable for the classes is maintained and circulated centrally by the Director (Admissions & Examinations). The faculty is expected to strictly follow the timetable. In case any faculty member is on leave during any class, he/she must inform the students about the alternate arrangement either directly or through the Dean/HoD office. However, such practice would normally require prior approval of Pro-Rector (Academic). During the first lecture of a course, the instructor- is required to distribute copies of the course outline, announce the office hours and evaluation policy in terms of weight assigned to its various components.

5.3 Course Development

The course development is an important process. It is generally done through a course development plan (CDP) to compile the foundational elements of the course in one place as an assessment platform for those engaged in developing the course/curriculum and professional development. It is derived from current syllabus or governance documents, course level objectives, course schedule, content delivery details and interaction plan, essentially required in online mode of teaching that has assumed greater significance in the recent times. The GIK study outlines help the potential students to plan their choices and organize the studies so as to facilitate their quick adjustment in the new academic environment.

In GIK, the candidates are required to complete certain credit points as per various programs for Bachelor and Master Degree programs and provided in the prospectus.

5.4 Course File

Every instructor is required to maintain a file regarding each course that contains the course contents, textbook (complete title, author name(s), publisher, edition and the year of publication), reference books, evaluation policy, and detail of the quizzes, assignments, case studies for the mid-semester and final examinations.

This file may also contain a list of the students registered for the course and their grades as submitted to Director (A&E). At the end of the semester, faculty would be required to submit this file to the office of the Dean/HoD. It is important to note that after adaptation of outcome-based education system the course folder should also include the mapping of each course students with course learning outcomes (CLOs) and Program Learning Outcomes (PLOs). This mapping is required to be undertaken for each student individually and normally supplied to the concerned faculty (in case of an interfaculty/Service course) to the concerned faculties on their request or by end of a semester when it is ready. In case of online teaching, similar arrangements will be made and uploaded on CMS also.

5.5 Code of Conduct

The Institute believes in reasonable behavior and steps to prevent the occurrence of misconduct of any form. As per related policies and provisions contained in the Hand Books, any act of misconduct and those responsible for such behavior including employees and the students are liable to necessary action.

It includes any action on behalf of the Institute that directly affects a business in which they have a financial interest, participating in any action on behalf of the Institute directly affecting the business in which they have their financial interest, procurement for the Institute from an enterprise in which he has a financial interest, unauthorized use of privileged information coming across from the official activities of the Institute, disclosure or access to any third party or make other use for personal gain of Institutes research, materials, records, educational courses, programs or educational materials, trademarks, copyrighted material, insignia, names, tradenames, donors information, alumni or students or any other kind of confidential or proprietary information which is otherwise restricted or not available. This will not be applicable to any information usable with permission of relevant authority and proper venues for acquiring prior advice on matters relating to possible conflicts of interest or the interpretation and application of related policies/regulations etc.

5.6 Classroom conduct

An instructor is responsible for all classroom conduct and discipline. GIK Institute policy permits only enrolled students and persons authorized by the instructor to be admitted to instructional areas during scheduled periods.

For reasons ranging from the discomfort of non-smokers to the defacement of property, smoking is prohibited in the entire faculty areas.

5.7 Academic Freedom

The Institute believes in academic freedom for its being of fundamental nature for advancement of truth. The GIK Faculty is provided free environment to freedom in research, publication in conjunction with adequate performance of other academic duties. Freedom in class room is expected to be exercised in relation to the subject and without resorting to use of any controversial material or subject matter, not related to one's subject. A faculty member is expected to be accurate, exercise due restraint, be respectful to the genuine opinion of others, and make every effort to indicate that he/she is a spokesperson for related policies of the Institute, abides by the regulations of GIK Institute and perform the duties assigned to him to the best of his/her ability.

5.8 Academic Prohibition and Suspension

The Institute discourages discrimination, dishonesty in academic matters, misconduct in Research, authorship and plagiarism. Such acts may cause academic prohibitions and suspensions which are decided by the Dean's Committee. These decisions are made by the Committee on the basis of information supplied by the concerned Dean/HoD and/or Director (A&E). Based on academic or disciplinary misconduct a concerned faculty member can be suspended from academic or official duties subject to prior approval of competent authorities, as prescribed by the Institute.

5.9 Grading System

Students are rewarded grades with A, A-, B+, B, B-, C+, C, C-, D+, D, F, I, W & E for each course. These grades indicate the following levels of performance:

A - Excellent performance

B - Good performance

C - Adequate performance

D - Minimal acceptable performance

F - Failure, implying that the student must repeat the course to receive any credit

I - Incomplete

W - Withdrawn

Each grade is assigned a Grade-Point per Credit (GPC) given in the table below:

Grade-Point per Credit (GPC)	
Grade	GPC
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
F	0.00

The above gradation is subject to the following;

- i. I, E and W grades are not counted in the calculation of GPA.

- ii. The academic standing of a student is referred as grade point average (GPA) which is the ratio of the total number of grade points earned to the total number of credits attempted. The maximum possible GPA is 4.00.
- iii. The minimum semester GPA to remain in satisfactory academic standing is 2.00. Students are placed on academic probation at the end of any semester in which their semester GPA falls below 2.00.
- iv. A student on probation is allowed to register only for 10-13 credit hours. A student whose semester GPA remains below 2.00 is given a warning for his/her poor performance.
- v. If his/her SGPA remains below 2.00 for two consecutive semesters (including summer school) his/her name is removed from the Institute roll. Freshmen, upon request, may start afresh with no credit transfer if two consecutive probations are experienced in the first two semesters.
- vi. A student separated after the first year may be readmitted or allowed to continue studies, if laid down conditions are fulfilled.
- vii. The grade I (incomplete) is given only when extenuating (beyond a student's control) academic or personal circumstances prevent the completion of the student's course work before the official end of a semester.
- viii. A grade "I" automatically becomes a grade "F" if not removed by the ending date of the following semester.

(i) Change of Grades

No grade (except "I") can be raised by completing extra work. If a grade must be changed after submission of the faculty member's grade report to the Controller of Examinations, a Grade Change Form must be filled by the instructor (recommended by the concerned Faculty Dean) and sent to Pro-Rector (Academic) for approval. Such requests will not be entertained past thirty days after the semester ends.

(ii) Deadlines

Grade reports are to be notified by Director (A&E) maximum within two weeks after the final examination.

(iii) Grade Reporting

Grades for all students are reported to Director (A&E) at the end of the semester. A special class list on which the grades are to be entered is distributed in advance of the final grade deadline.

The Grades are reported, after validation by HoD/Dean/Pro-Rector (A), and published by Director (A&E). The Instructor uploads the same on the CMS and is visible on GIKs website.

5.10 Academic Integrity

The Institute always support an appropriate environment, culture and values on basis of best educational practices. The principles are fostered and ethics are adopted as primary responsibility of the academia and the students for academic honesty and personal integrity. The Institute ensures that faculty members fulfill their responsibility to make students realize of general code of conduct that dictates their academic work at GIK and also evident from the students' academic works submitted by the students.

Policies are adequately publicized (and through this handbook also) for maintaining the academic integrity and enforcement thereof. All such efforts are made through implementing the entire policy framework including other policies such as plagiarism, grievances, intellectual property, conflict of interest and harassment for maintaining overall academic integrity at the Institute.

5.11 Outcome Based Education

GIK Institute is of the first few engineering universities of Pakistan that has adopted the Outcome Based Education (OBE). In 2018, Pakistan become signatory of Washington Accord agreement. Consequently, all Engineering programs that are OBE accredited from Pakistan Engineering Council (PEC) become equally acceptable to the equivalent programs of all the member countries of Washington Accord.

The OBE system is different than the traditional education system followed in Pakistan. In OBE all Engineering Programs are expected to have certain learning objectives known as Program Learning Objectives (PLOs). Each degree program PLOs are then mapped with the course learning outcomes included in that particular degree program. These course learning outcomes are called CLOs. GIK Institute Engineering programs has in total 12 program learning outcomes that includes: engineering knowledge, problem analysis, design/development of solutions, investigation, modern tool usage, the engineer and society, environment & sustainability, ethics, individual & team work, communication, project management, and lifelong learning.

Every course learning outcome (CLO) need to be defined in such a way that it is mapped with these 12 PLOs of engineering program. Furthermore, during delivery of the courses these CLOs are worked out and measured for each individual student as per requirement of OBE System. These CLOs for each student are covered through various graded and evaluation activities during the course and by the end of course a complete detailed reported is prepared for all the student being registered for that course.

The Institute has been arranging number of workshops, seminars and trainings sessions at Institute level or with the guest invited in the matters related to OBE education system. Being one of the earlier adopter of this system, some of the faculty members have been the trainers of the OBE at country level.

5.12 Office Hours

Normal office hours of the Institute are 9:00 am – 5:00 pm on five days a week basis, with lunch break of one hour from 1:00 – 2:00 pm. On Fridays, the break is from 12.30 to 2.00 pm. Faculty members are required by the Institute to remain available to students by scheduling and honoring office hours so as to support the students facing difficulties in understanding the lectures. Every faculty member would be required to have office hours of at least 5hrs/week, in a time convenient to the students registered for the courses he/she has offered keeping in view the timetable. Such schedule is announced under intimation to the Dean/HoD accordingly.

5.13 On campus duty days

Except for authorized holidays, vacations, or other recesses posted in the academic calendar or otherwise announced, it is the obligation of each faculty member to perform all assigned duties and commitments within the designated time. Furthermore, each faculty member is expected to be available for campus duty for at least one week before the start of classes.

5.14 Holidays

The annual holidays observed at the Institute includes Eid ul Fitr, Eid ul Azha, Eid Milad-un-Nabi, and Ashura Moharram. Employees are notified of the exact dates to be observed for the above listed holidays, no later than January of each year.¹ Should the holiday fall on a working day, the next Saturday is declared to be working as compensation. Other state holidays are decided by the competent authority.

5.15 Academic advertising

The goal of the academic advising guide sheets and sample plans of study is to promote undergraduate student success by guiding all students to timely completion of an undergraduate degree. Students are not limited to the course sequence provided for their academic program. Instead, the sample plan of study is one possible path to completing your degree and is meant to be used as a guide for planning purposes in consultation with an academic advisor. The plans also help students prepare for meetings with their academic advisor and track their progress in their selected academic program.

In order to encourage the students to familiarize themselves with required courses for their academic program and Institutes academic schedule, effective communication is made for smooth implementation of overall plan. The academic advertisement is used as a tool and guide sheet to determine individual students' academic roadmap and provided through the Dean's office. At GIK,

¹ The academic calendar is announced in advance and it includes all information regarding holidays for an academic year

Dean/HoD's offices provide procedural information, serve as the contact point for the new students, and facilitate the students to specific faculty members so as to prepare and up-date their plans at the end of each semester in terms of their preferred choices as to courses etc.

5.16 Students' Registration number and Email

Each student at GIK Institute is allotted an identification number. This number is used for identification, record-keeping and other reference purposes. The first four digits are their enrolment year followed by a number according to student's names in alphabetical order. e.g. 2019XXX. Email addresses are based on registration numbers and are of the form: u2020xxx@GIK.edu.pk for undergraduate students.

5.17 Allowable maximum (student) semester hour load

A student may attempt maximum twenty-one credit hours in a semester with approval. In case of probation in last semester the student is not allowed to attempt more than 13 credit hours. During summer school, the maximum limit is eight credit hours.

5.18 Audit a course

A student wishing to audit a course may be enrolled as a regular student on a non-degree status but must have paid the tuition fee. At the time of registration, the student (on the registration form) must clearly indicate the intention to audit the course.

5.19 Faculty Transfer

Faculty transfer of a student is considered at the end of the second semester. Such transfers are to be approved by the concerned Dean and are on merit basis.

5.20 Withdrawal from GIK Institute

A student cannot withdraw officially from GIK Institute by merely seeking the permission of an instructor/ faculty member. Withdrawal cases have to be processed through the Admission and Examination office in accordance with the prescribed procedure.

5.21 Class Lists

From the data acquired during registration, temporary class list is prepared for each class. These temporary lists are made available to instructors through CMS. After the fourth week of the semester, permanent class lists are made available on CMS.

5.22 Class Scheduling

Academic scheduling and other acts such as creation of class schedules for each semester, room and advisor assignments, addition and cancelling of the class sections, etc. is the responsibility of the Deans/HoDs'. Before the start of each semester, forms are sent to Dean of each Faculty/HoD requesting for complete information concerning faculty course offering for that semester. Faculty indicates courses to be offered, desired schedule, preferred classrooms, and anticipated enrolment size of each course. This schedule is developed and distributed well in advance of the start of each semester and changes, wherever required, are only made with the approval of Director (A&E).

5.23 Classroom Change Requests

If the classroom assigned for a course is unsuitable for a valid reason such size or other factors, reassignment to another room is considered. Classroom assignment is the responsibility of the office of Director (A&E).

5.24 Final examination schedule

Final examination schedule for all classes, as considered appropriate, is usually issued during the last week of the semester. The final examination schedule is, however, announced at least one month in advance so that students and faculty can make their end of the schedules semester plans. Once published, the examination schedule is not to be changed, except with prior approval.

Any student having conflict in an examination schedule such as multiple examinations in one day, may make a request for a separate examination time from the course instructor. In such cases, the course instructor makes a separate schedule for such students and allots a suitable exam time in consultation with the student. Such changes are made with approval of concerned HoD/Dean, Pro-Rector (A) and Director (A&E).

5.25 Existing Program and Course Review

The faculty member is responsible for reviewing his course after completing for any improvement and upgradation. Moreover, the faculty also reviews its various curriculums periodically to stay at par with national and global academic trends.

CHAPTER 6

SCHOLARSHIPS & RESEARCH

6.1 General Principles

Research is elemental to the strength of GIK Institute and plays a major role in helping the faculty in accomplishing its mission. Our faculty earned exceptional recognition in research, joint international collaboration and provision of technological expertise for the benefit of our country, nation and the industry. In terms of quality, our research facilities bear comparison with the best available anywhere in the world.

6.2 Scholarship and research support for faculty

The Institute strongly encourages its faculty for research and scholarship and provide a vast range of incentives. The Institute does allow Lecturers for higher studies abroad subject to certain minimum number of years of services at the Institute. There is a good number of teaching staff that are on study leave from the Institute and are currently at different stages of their PhD studies abroad.

Assistant Professors and above can go on research leave during summer or even during Academic year subject to the approval of competent authorities. A good number of faculty do avail these opportunities during summer every year.

In order to encourage R&D activities and motivate its teaching faculty, the Institute provide number of incentives. There are monetary benefits in the case of publications plus having additional teaching load. Monetary compensation is given for Journal Citation Report (JCR) indexed research journal publication for any additional paper over and above the required number of publication in the existing rank of job.

The Institute offers “Research Award” on annual basis. These are three awards given to faculty members that excel in the field of research. In addition, the Institute has two “GIK Faculty Award” consisting of cash prize and certificate on annual basis to engineering and non-engineering faculty. This award puts more weightage on teaching methodologies.

There are possible monetary incentives for supervisor of MS and PhD thesis. Faculty is provided partial or full support for attending local and international conferences. To attract good quality we allow the scholarship for students at all levels, particularly to the talented MS and PhD students who particularly extend the support to faculty members for promoting R&D and serve as a useful manpower.

6.3 Norms Policies and regulations guiding scholarship and research

The Institute is open to all persons of either sex and of any religion, color, creed, class, or domicile who are academically qualified for admission to the courses of study offered by the Institute, and no such person shall be denied the privileges of the Institute on the grounds only of sex, religion, color, creed, class or domicile. The admission to the Institute is strictly on the basis of merit determined by its own admission test. There are no special quotas, reserved seats or admission by donations nor any arbitrary age limit for the applicants, but preference will be given to fresh graduates.

6.4 Collaborative Research

GIK attaches great importance to strengthening bilateral and other sorts of cooperation in the field of engineering & scientific research with local, regional and international agencies and institutions. They are aimed at enhancing its name and reputation in the field of scientific and other related research fields through joint research activities. The Institutes, in such agreements, always prefers to be selective, indicates research areas, specific objectives and benefits of cooperation, project participants, funding, duration, resources, financial obligations and other aspects needed for implementing the appropriate agreements. A number of agreements have been signed with Turkey, China and other countries for this purpose including renowned MNCs'.

6.5 Graduate Studies

Graduate Studies were started at GIK in 2001 by supporting and sponsoring the graduate programs in the university. Today, the GIK is implementing 09 masters and 07 PhD programs in different fields that are fully funded. The number of graduate programs has significantly increased during previous years which is a healthy sign. The Institute has started offering a number of teaching assistant and research assistant scholarships for high-merit students. This scheme has worked very well due to its inherent benefits and the Institute supported around 150GAs & NRPU and 37 PSS in 2019, mostly funded by GIK, HEC and PSF etc.

6.6 Consulting work/ work outside the Institute

Consulting & Customized Services: With modern research facilities, state-of-the-art laboratories and best human resources, the Institute offers customized training, consulting, and technical assistance for industry-specific needs.

GIK is actively involved with the local industry in consultancy projects. The consultancy work is mainly related to R&D and forensic investigations. Local collaborations with universities and R&D organizations are also encouraged.

The Institute has its consulting work policy 2018 that is applicable in case faculty member want to be part of any consulting or work outside the Institute. The latest policies may be obtained from concerned departments and the website. However, such activities are treated as private relationship between the faculty member and the related entity and may be allowed with certain limitations. In the cases where boundaries of consulting work and individual's responsibilities for the university are "visibly blurred, a more responsible behavior is expected from faculty members" in terms of use of Institutes resources and gains from such projects.

6.7 Institutional support for Research & Development

The Institute encourages its faculty to apply for external funding for research and development. The mechanism works as follows. First, the proposal has to be prepared by the Principal Investigator (along with other Co-Principle Investigators, if applicable). The proposal along with technical details also must include the financial details about the proposed study/project. It is then submitted to ORIC, and via Pro-Rector (Academic) and Pro-Rector (A & F) office. Once approved by Rector Office, it is submitted to the donor agency for further necessary action.

CHAPTER 7

STUDENTS RELATED POLICIES

7.1 Student Privacy

The Institute has an approved policy for guidelines for confidentiality of students' records. Official academic records are maintained by the Admission and Examination Department. Following persons may have access to student's record:

- GIK Institute faculty and staff members related to academic programs
- Donors arranging sponsorship for student fee fully or partially
- Parents
- Any other person or organization with the written consent of the student
- Legal requirements and statistical data

7.2 Smoking, Alcohol and Drug Abuse

- Use, possession, or sale of intoxicating beverages, is strictly prohibited within the Institute campus, sports, cultural or study tours of any official tour conducted by the student or student's organizations outside the premises of the Institute.
- Any conduct that may have been influenced by alcohol or drugs will not limit or excuse the student's responsibility for his or her action.
- The use, sale, possession, and/or distribution of illegal drugs and drug paraphernalia are prohibited.
- The workplace is drug-free. Smoking in classrooms, laboratories, workshop, faculty buildings, library, examination hall, convocation hall/Agha Hassan Abidi.
- Auditorium, TV lounges/common rooms, dining halls/mess, all hostels and other public places of the Institute is prohibited.

7.3 Abuse of Self or Others

Maliciously and intentionally committing one of the following acts because of a perception of the victim's race, color, religion, ancestry, national origin, gender, or mental, physical, or sensory handicap is prohibited:

- Inflicting mental or bodily harm upon any person (including one's self).
- Engaging in any intentional or reckless action that may result in mental or bodily harm (including to one's self).
- Causing physical damage to or destruction of the property of the victim or another person.
- Threatening a specific person or group of persons and placing that person, or members of the specific group of persons, in reasonable fear of harm to person or to property.

7.4 Dishonesty in Academic Matters

Each student is expected to maintain the highest standards of honesty and integrity in academic and professional matters. GIK Institute reserves the rights to take disciplinary action (up to and including dismissal) against any student who either is found guilty of academic dishonesty or fails to meet the standards of academic honesty. Academic dishonesty includes (but is not limited to) dishonesty in quizzes, tests, assignments, claiming credit for work not done, claiming credit for work done by someone else, and non-disclosure or misrepresentation in filling out applications or other GIK Institute record.

When a violation of regulations occurs in connection with a course (or seminar, or any other academic activity under the direction of the course instructor), the instructor is authorized to take any action deemed appropriate. Before taking any action on an alleged violation of rules, the faculty member should be certain about the existence of a substantiated proof to support the charges.

However, no penalty is in excess of an "F" in the course and the involuntary withdrawal of the student from that class may be imposed. Whenever such a penalty is imposed by the faculty member, he/she must submit a detailed written report to the concerned Faculty Dean and Dean Student Affairs. The course instructor may also refer the matter to the disciplinary committee which may decide to impose additional sanctions.

To be fair to students, it is recommended that faculty members teaching courses, inform the class at the beginning of each course about the GIK Institute's policies with reference to dishonest academic practice and about any additional policies implemented for that particular course.

7.5 Firearms Policy

No student is allowed to carry, possess, or use any firearms, explosives, dangerous chemicals, or dangerous weapons (including, but not limited to, shotguns, rifles, pistols, air guns, pellet guns, longbows, hunting bows, throwing weapons, etc.) inside Institute premises. In case a faculty member has any weapons with a valid official license issued by the government of Pakistan and had it in their possession, they must bring that in the notice of the head of security of the Institute. Student Housing.

7.6 Student-Faculty Relation

GIK Institute is a fully residential campus. All the faculty, students and almost all other employees stay on campus. Perhaps GIK Institute is the only academic institution in Pakistan that offers such services to its students and employees. This, on one hand, provides unique learning opportunities for the students, excellent research environment for the faculty, and, on the other hand, poses various challenges for the students because most of them are away from home for the first time.

Students face a number of challenges while they join the GIK Institute. Therefore, faculty members get an additional responsibility beyond classrooms to groom and guide these students throughout their academic career. A document on such details is included as **Annex-L**.

The teacher and students, during the learning pursuits of all kinds such as educating, mentoring and evaluation, naturally come into contact. The relationship so created is expected to be based on mutual respect and trust and is very important and is often considered as the foundation of educational system of the universities. The educational institutions frame policies in this regard that prohibit intimate relationship including work place harassment for controlling the inappropriate behavior.

GIK believes that faculty/staff and student consensual relationships may lead to conflicts of interest, exercise of favoritism, fair treatment and objectivity for effective teaching and learning, bias and may even undermining the integrity of the academic environment. The Institute. It discourages irresponsible behavior of all concerned and has formulated the policy which is attached to the Hand Book. Such policies certainly discourage inappropriate behavior and help avoid the same. The faculty is expected to behave in a responsible manner and liable to protect the students from discrimination and any kind of misuse and impairment of learning process by developing highly professional relationships between faculty members and students.

Faculty/staff and student consensual relationships give rise to actual or apparent conflicts of interest, favoritism, and bias thereby undermining the real or perceived integrity of the academic environment.

7.7 Student Scholarships

Furthermore, the Institute allows the scholarships to the students at undergrad, MS and PhD levels in order to attract the talented students on basis of such scholarships. They ultimately serve as a good HR to assist the faculty in carrying out the research and development activities in different academic fields for overall benefit of the Institute, particularly those awarded to the MS and PhD students in different disciplines.

CHAPTER 8 ADMINISTRATIVE SUPPORT AND SERVICES

The Administration & Finance Wing provides necessary institutional support to faculty in the areas of financial planning and budgeting for staff and labs, procurement and management of human and physical assets by formulating personnel policies, structure and objectives, evaluation of performance and compensation practices, security, renovation and maintenance of infrastructure, real estate management, messing and customers services and auxiliary services, review and approval of contracts for services, benefits, maintenance, assets and equipment and their alignment with Institutes overall programs.

Finance Department handles all policies and procedures and extends support in preparation of the academic budgets proposals and their approval including any during the year needed budget revisions, reviews and gets approved the expenditures from budgets of each faculty/department and works with PRAF in the control of budgets and establishment of proper accounting procedures. He also reviews requests and presents the faculty needs to the PRAF in cases where contingency funding or budget revisions are needed.

Project and grant management and accounting, internal controls and compliance with financial and budgeting rules/regulations, maintaining complete books of accounts of all operations and furnishing of reports of receipts and expenditure including tuition fees and other receipts from the students, financial assistance/other awards to the students and awards to faculty, management reports in respect of financial activities and those for internal and external analysis are performed through Finance Department of the A&F Wing. The Information Technology and HR support functions are dealt at length in view of their importance for the Academics.

8.1 Information Technology

The faculty is assisted by Information Technology Department of the A&F Wing. It provides all sorts of information technology resources and the Institutes Web. It is responsible for IT operations, management and maintenance and use of Institutes information technology and resources including computer handheld devices, web pages, email systems and addresses, wireless connectivity, and research computing servers, and support the Campus Management System based Software Applications including on-line education. The department is governed by the Information Technology Policy.

Its core responsibilities include development of strategic objectives for information technology, collaboration with IT systems, Academics, manages networks infrastructure and related appliances, to ensure network stability and uptime for the students, offices and faculty> The department develops and carries out appropriate procedure for Institutes networks security and integrity of the data, manages the technological assets on the campus, provides technology sources for effective learning systems and trains in responsible use of technology including requisite

software systems and services to support Institutes academic and administrative as well as student's needs.

The IT Department also provides software Application development support, Hardware maintenance support and IT projects to meet the faculty's systemic requirements. Website of the Institutes and IT help desk is one of the important functions of GIKs IT Department. Effort is always made to provide adequate level of privacy as well as security for personal use and information on Institutes information technology devices and systems.

8.1.1 Web Portal

GIK has its own Portal (<https://www.giki.edu.pk>) that provides with access to a gateway of various personalized web-tools to the entire community of the Institute through their active accounts. The portal has a secure and centralized location to access all online services available at the campus with special focus on collection of information for the faculty and the students.

Sharing expertise and resources in a formal manner, GIK Institute encourages affiliations and collaborations with other international universities and R&D organizations of repute to enlarge the world of knowledge and opportunities for our faculty and students, technical staff and management from industry, and other stakeholders.

GIK has its own portal ([giki.edu.pk](https://www.giki.edu.pk)) that provides with access to a gateway of various personalized web-tools to the entire community of the Institute through their active accounts. The portal has a secure and centralized location to access all online services available at the campus with special focus on collection of information for the faculty and the students. It focuses on supporting education and deliver services to GIKians with Internet access, in multiple areas that include e-mail, chat functions, instant messaging, and even personalized services such as online learning.

The GIK website facilitates the students for online education through Ask-A-Librarian option on main page, through which students can contact librarian and ask for a question or suggestion related to library, online classes schedule and survey form for identification of students who are ready for online education.

8.2 Online Learning system

The online learning service has been made available to faculty members and students. On basis of LMS and Microsoft Office 365 licensed service, GIK provides a reliable e-learning platform enabling a web-based and user-friendly course management system for online lecture uploading in a student-centric online learning environment. The programs have consistently been enhanced with several apps. It is supported by modest classroom technologies for support facilities for related course instructor for the scheduled classrooms', equipped with requisite equipment for

online teaching. To quote an old anecdote, “cooking is easier when all the families have equipment”.

The Institute realizes the importance and influence of the system on effectiveness of e-learning in terms of proper equipping, functionality, interaction, support ICT infrastructure, and systemic response coupled with course instructor’s training, attitude, technical skills, and instructional methods adopted while going on-line.

Accordingly, after closure of the university in the wake of COVID-19, the system has further been supplanted through better supporting network infrastructure, more trainings to faculty members and regular IT support for fundamental building blocks and related activities like up-loading, recording and delivery of live lectures by course instructor, and better communication through regular live sessions and conferencing in the Institute and with the students. The HEC guidelines in this regard have been complied with by adjusting the system and processes so as to extend maximum academic benefit to the most students.

IT Department also renders technical support for special event organized by the Institute, faculty, staff and students by setting up, testing, and installing the required equipment, as well as providing staff for technical support during events, Skype and Videoconferencing, other online conferences, webinars and other IT based activities. Live webcasts of special events such as signing of agreements, convocations, and class commencement events are usually hosted on the Institute’s Media site server.

A comprehensive approach has been adopted institute-wide that keeps the GIKians’ organized, interested and accountable after making them aware of the Institutes distant learning programs. The ultimate aim is to use IT tools to build curriculum and to effectively run an electronic class room in which the students and the teachers interact as a community through a robust system that has the capacity to measure the learning progress of each student.

8.3 Human Resources Department

The Human Resources Department performs duties that include formulation and recommendation of personnel policies and broad objectives for the Institute, their implementation, placement of support staff, administering compensation structures, provides guidance and assistance on such matters as employee benefits, management/employee communications, grievances and appeals, and employee conduct and discipline, employee training and development programs to achieve both organizational goals and personnel management objectives.

The HR part of the Handbook is critical in so far as it engulf various factors very pertinent to the faculty. Accordingly, we have included the most important aspects starting from hiring and appointments, code of conduct, agreements/contracts, terms of employment, health, payroll and other work place policies, expense reimbursements, leaves and vacations. Also valuable are details

of working hours, performance expectations and evaluation, compensation and benefits, opportunities, case specific related information, accommodation, promotion, harassment and discrimination, drugs policies and other related matters; all in order to emphasize the important and specific piece of information faculty may be looking for their attention, use and reference back to the Institute.

The employment related affairs of faculty and administrative staff of GIK are dealt with by HR Department. Based on HR policy and procedures, HR supports the faculty in a positive manner to help create enabling environment for enforcing the policies, rules and practices by facilitating them. It develops plans and programs in the light of these elements to meet the recruitment needs and specific tasks and responsibilities efficiently and in a timely fashion. Of late, remote learning has also been started on selected basis for a limited period to meet the visible future needs.

Furthermore, as part of automation drive, the HR system and processes are being computerized that will enable HR to offer support services more efficiently and effectively. The salaries and benefits offered are reflected in the hiring contract Agreed on signing and remitted in the given bank accounts on monthly basis. The faculty is entitled to different benefits also stated here-in-after. The policies are aligned with growth and strategic goals of the university which are monitored as to their effectiveness while management provides direction and leadership to HR for faculty services functions.

8.4 Bookstore

The Institute has a book store located in the tuck area. The store has books for the students related to various courses along with stationary related items. Books can be ordered by them, in case faculty members need a book for students or personal use. Besides that, books can be ordered/arranged via library too.

8.5 Tuck Shops

In order to meet day to day needs, there are a number of shops and dining places named as tuck shops. There are a couple of superstores at the tuck that provide grocery and other daily items at reasonable prices. Besides that, there are a number of other shops namely laundry, barber, souvenir, bookstore, and a photocopy shop (it also has mobile-phone accessories and balance recharge facilities etc.).

8.6 Food and dining

GIK Institute runs a cafeteria on a non-commercial basis. It provides food and refreshments at mealtime and runs throughout the year. This cafeteria charges nominally.

Besides the cafeteria, there are two other dining places at tuck that are run by external parties on a commercial basis. However, GIK Institute administration ensures compliance with mandatory cleanliness, quality and price control. These commercial entities are also run throughout the year.

8.7 Bank

There is one branch of Habib Bank Limited on Campus. All faculty members and employees do have their salary bank accounts in this bank. The bank also has two ATM facilities. In addition, the Bank provides facilitates the parents through network of HBL branches in payment of fee and other charges from the places of their choice.

8.8 Service Center

GIK Institute runs a service station. This service station has three sub-sections namely: Printing Press, Photocopies Section and Mail Section. Printing press deals with printing various documents such as visiting cards, various kinds of registers needed for different offices, official letterheads etc.

Photocopies section deals with photocopying various documents such as question papers, official documents, student notes, slides, reading materials etc. This section on average does process about 1.5 to 1.7 million copies per year, out of which about 60 percent are official and 40 percent are for students.

The mail section deals with official mail correspondence. GIK Institute has an official arrangement with TCS courier service and it gives up to 70 percent discounts on official mail/packages across the globe.

8.9 Lost and Found

If an item is left behind by a student either in the Lecture Halls or in department areas and picked up by any staff and brought to the notice of Store Keeper/Caretaker is termed as a “Lost” item. There is one dedicated location (Dean Student Affairs Office) to receive “lost and found items” whether it is found either in lecture halls, meeting rooms, or department areas. The lost items will be secured in a locked closet. Employees are instructed to bring items to the Lost and Found Department, with valuables receiving immediate attention.

It may be noted that all items received are recorded in a lost-and-found register regardless of their value. Items are placed in a plastic bag noting the serial number from the register, place found, date and the name of the person found the item etc. Valuable items like Jewelry, mobile, wallets, laptops, tablets etc. are stored in a locker.

If the department has an auto trace functionality, then it puts a trace on the student profile stating that there is a lost item held with the housekeeping department. An email is also sent to the students

to notify the students about the lost item. Student/Faculty can get back their items by contacting the relevant person in the DSA office.

One separate register is maintained for valuable lost and found items and the items are kept in a safe Deposit Locker. Valuable items are kept for a period of six months. If there is no response from the student, an auction is conducted. These category items are kept for three months in safe custody after making necessary entries. If there is no response from the owner of the lost item till the time, these items are then disposed of. Perishable nature lost and found items are kept for three days. In case if an item is needed to keep for a longer time, proper procedure is followed.

8.10 Faculty Club

GIK Institute is a fully residential campus and all faculties along with families stay on campus. In order to increase the interaction between the faculty members and to create a good family environment on campus, the Institute has a Faculty Club run by the faculty members on bi-monthly participation for a nominal monthly contribution. Activities of the Faculty Club include the bimonthly dinner, activities for the children, trips to any recreational point etc.

8.11 Maintenance

There is a maintenance department working in GIK Institute. Any kind of maintenance (at residential or office areas) can be reported to them on their intercom number. They record each complaint and assign a complaint number to it. A relevant person is assigned to each complaint and that person accordingly fixes the problem as soon as possible.

8.12 Mosques

There are three mosques in the Institute. One mosque (called student mosque) is located close to the student hostel and main playground. It has a large capacity, having a spacious place for prayer with the availability of various Islamic book collections. It is a Jumma mosque with five-time congregations on announced prayer schedule. The second Jumma mosque that is located close to the residential area also has the same arrangements. The third one is a small mosque close to the guest house and GIK College. It was the first building constructed at GIK Institute site. It has five-time congregational prayers; however, there is no Jumma prayer in this mosque. During Ramadan, there are special Tarawih sessions in all the three mosques.

8.13 Sports and Recreational Resources

GIK Institute has abundant sports and recreational activities. GIK Institute has its own sports gymnasium having indoor sports arrangements for sports like table tennis, basketball, volleyball, badminton, fitness gym etc. Besides that, there are three squash courts, and a billiard table as well. There is also a swimming pool. Similarly, for outdoor sports, there are two tennis courts, a big

ground that has two cricket pitches, and football sports arrangements. The grounds have lights arrangements and most of the student sports activities during the weeknights are under lights.

A regular semester is saturated with various sports events such as cricket championship, indoor/outdoor football tournament, chess tournament, basketball tournament, hockey matches and table tennis competitions.

8.14 Public Relations Department

The GIK's Public Relations Department is mandated to build its well-balanced image through purposeful media. It endeavors to highlight the achievements and successes realized by students, faculty members and the university. It keeps all abreast of the developments in the field of education and technology in the country and covers the events and other activities of the Institute. Please bring relevant material here for the following subjects or adjust it properly source annual reports also.

8.15 Marketing Department

The marketing department has also been energized of late and it has drawn a policy to provide proper marketing support to the Institute. Its responsibilities include relationship building, development of global and local marketing plans, marketing strategy, custodian of GIK brand and planning and budgeting among others.

8.16 Medical Center

Medical Center at GIK Institute is an on-campus health and medical facility to its employees and students. Medical Center is headed by MS supported by a lady doctor and two other doctors in addition to other support staff. The hospital also has its own pharmacy, lab, and ultrasound, x-rays facilities. An ambulance is available around the clock to cater any emergency. Besides that, during that day time, all doctors are available and during night shift there is at least one doctor available on call for dealing with any medical emergency.

All faculty members, on their joining day, have to undergo a medical fitness test from the hospital and they are also registered with the hospital. They are provided with free consulting, free medicine and, if they needing further treatment, there are number of hospitals in Islamabad and Peshawar that are on GIK panel, to where the cases are referred. Recently, the Institute signed a MoU with CMH; and now GIK employees can also avail of the health facilities at CMH Tarbela as per the Institute arrangement with them.

8.16.1 Management of COVID-19

Onset of COVID-19 seriously exposed the GIK campus also. The Institute formulated an effective policy and issued SOPs for prevention and control of spread of virus in the Institute. The doctors and staff made all out efforts in this regard and their services were duly acknowledged. A new plan has been devised for safety and security of the students after expected reopening of the Institute in September, 2020 after many months.

8.17 GIK College

The GIK College is an on-campus college that does cater to the demand for the education of the children of Institute's employees, though it also allows admissions for the outsiders. GIK employees get concessions in the monthly fee and annual charges (the Institute pays the remaining fee and charges). GIK College provides education from nursery till intermediate level in affiliation with the Federal Board.

8.18 Transportation

GIK Institute provides transportation facilities to its students and faculty members. Every Friday GIK Institute buses provides students and faculty members ride to Islamabad and Peshawar and on Sunday evening bring them back throughout the year. In addition to the rides on Friday and Sunday, there is a bus service on Saturday morning from GIK Institute to Islamabad that comes back to GIK Institute on Saturday evening. The Transportation Department deals with all these arrangements. The transportation department issues a time schedule (that is circulated via email) for the bus timings during mid of every week. An advance booking with the transportation department is mandatory in order to avail this facility.

The GIK Transport Department provides a variety of services for movement of the students, staff, and faculty and the services needed for official visits and conferences and personal (on payment). Weekly shuttle service is provided for Islamabad and Peshawar. It also administers regular trips for GIK school/college students within Topi, study tours for the wards of faculty and others to various places.

8.19 Safety and Security

Security and Protocol Department is in charge of safeguarding security in the campus around the clock. It is the task of protecting all residents, facilities and buildings. The Security & Protocol Department is required for protecting the buildings and facilities from fire. In addition, the Unit is in charge of distributing car stickers (entry permits) to faculty, staff and students, as well as providing faculty and staff with access cards for main gates. With the ongoing automation process, the department is going to introduce a modern RFID/other technology based card system in the Institute.

CHAPTER 9

MISCELLANEA

9.1 Office of Research, Innovation and Commercialization (ORIC)

Office of Outreach and Enterprise – OOE was formed at GIK Institute in July 2010; an attempt to provide better services to its students, alumni and industry. OOE was made responsible for industry relations, alumni relations, career counseling and placement of students, fund raising and business development activities, communication and marketing. OOE was involved also to propose, plan and execute any innovative ideas or initiatives to promote the Institute's objectives. Later, on the directions by Higher Education Commission – HEC, OOE was converted into Office of Research, Innovation and Commercialization – ORIC at GIK Institute. ORIC is operating on the same mandate with a lot more focus on Industry – Academia linkages and research collaborations.

Apart from teaching, any faculty members can apply for a research project throughout the year. While filling the proposal in the budget section the faculty member PI /CO PI mentions the remuneration amount for the project execution. The remuneration amount varies from project to project and donor to donor.

In case the PI wins a project, the faculty member PI / CO-PI gets the amount specified by the donor agency against the specific project. The donor agency sends the amount to GIK Institute and GIK releases the amount approved against specific heads i.e. PI / CO-PI remunerations, equipment, etc. In Brief for Industry, ORIC is looking forward to connect students, graduates and alumni with region's leading employers. ORIC plays an instrumental role of a supporting body that offers, GIK Institute research facilities, human resources, its expertise and skills to the industry for cooperative research and development projects.

ORIC work for alumni by building and nurturing lifelong relationship of them with the Institute and is looking forward to strengthen it further. The office is aiming to form a mutually beneficial relationship between the Institute and alumni, wherever they are located; also by providing alumni with opportunities to ensure that they feel a part of GIK Institute for good. Working close with GIK Institute Alumni Association – GIKAA, ORIC is offering a range of services and invitations to events organized by GIK Institute.

Finally, for the student ORIC is serving beyond routine lecture hall and laboratory activities as they guide the students towards their journey of becoming a professional engineer. It helps the students on understating students their ethical and professional responsibilities; understand global and societal relevancy enhancing their life-long learning. ORIC also help student for their jobs, future career, links with business, offers seminars, workshops and other professional trainings of the students. Finally, it also organizes events to connect employers, students and graduates with industry.

9.2 Quality Enhancement Cell (QEC)

The Quality Enhancement Cell (QEC) was established in 2008 at the GIK Institute. The cell works under the direct supervision of the Pro-Rector (Academic) and implements policies for quality assurance at the institute level. The internal quality assurance procedures and processes of teaching and learning assessment are in line with the HEC's quality assurance guidelines. The cell is responsible for analyzing data and providing support in compiling Self-Assessment Reports (SARs), formulating programs and assessment teams, arranging seminars on quality assurance and quality teaching. The cell also facilitates continuous quality improvement of Outcome Based Education (OBE) system. Following are the role and responsibilities of QEC:

1. To review of quality standards by auditing academic standards and the quality of teaching, learning and management in each subject area.
2. To monitor the implementation of qualifications framework of HEC by setting out the attributes and abilities that can be expected from the holder of a qualification, i.e. Bachelors, Master and PhD programs.
3. To ensure the implementation of program specific standards. These are standard set of information clarifying what knowledge, understanding, skills and other attributes a student will have developed on successfully completing a specific programme.
4. To ensure that the university's quality assurance procedures are designed to fit in with the arrangements in place nationally for maintaining and improving the quality of Higher Education.
5. Annual monitoring and evaluation including program monitoring, faculty assessment, and students' perception through surveys, such as:
 - Departmental review.
 - Student feedback.
 - Employer feedback.
 - Alumni feedback.
 - Faculty Satisfaction Survey.
 - Semester-wise Course/Teacher Evaluations.

9.3 Career Services Office

The Career Services Office is working under the domain of ORIC at GIK Institute. ORIC – Career Services Office is focused on connecting:

- Students to careers and job options.
- Industry to students and graduate talent.
- Faculties/study disciplines to employability and graduate outcomes.

Career Services Office helps students to set career goals and implement real-time strategies to achieve their goals. They are helped to increase their employability options as they go through their studies. Therefore, when they apply for opportunities along the way or after graduation, they are more competitive to start on the career they seek as an engineer or a professional.

Career Services Office is one of the GIK Institute's vital units. Our career advisers and faculty coordinators work closely with undergraduates, graduate students, and alumni at the same time as they explore career interests, options, and opportunities, from internships to jobs and to further studies.

The office brings prospective employers to campus, maintains close relationship with industry, and interacts with faculty and the GIK Institute's alumni. Career Services Office helps students to get a sense of the connection between them (their discipline, their experiences, their skills, their qualities and their values) and the real professional world. Additionally, it educates the students about what it is that employers are looking for, and having this in mind, how they can develop according to the industry requirements before they complete their studies at GIK Institute.

The office provides the following services to get our students through their career plans:

- Career counselling regarding job search, job application, CV/resume building, interview preparation, etc.
- Internship placement and assistance for a job appointment.
- Information on prospective employers and job market
- Arrangement of career-related seminars, workshops and events
- The connection between industry, students and alumni

The Career Services Office assists organizations in promoting their opportunities to students by inviting employers to recruit and interview on campus, events, posting opportunities on our job board, disseminating those opportunities by email, and arranging internships.

The office has an internal communication channel and communicates with students and alumni through email, social media and text messages to disseminate any relevant information. Career Services Office initiates a strong relationship with all students when they reach the 3rd year of their studies until their graduation.

9.4 Incubation Centre-The GIK Catalyst

GIK Institute with corporation and support of Directorate of Science and Technology, Government of Khyber Pakhtunkhwa established a technological incubation center named as “The Catalyst”. The Catalyst has the objective to create an atmosphere for nurturing ideas into commercialized products. It also works as a platform for entrepreneurs to develop technology businesses, providing them with resources to produce a near-commercial ready prototype, focus on physical products

and algorithmically intensive ideas.

The Incubator allows budding entrepreneurs access to the latest technology equipment, machinery and research know-how at the Institute that are necessary to facilitate product design and commercialization. Top teams are selected from business plan competitions held regularly throughout the year. The selected teams are provided with office space, computer and internet facilities, monthly stipend, housing and more importantly access to the state of the art labs of the Institute, faculty and other resources to bring their ideas into commercial products.

9.5 Student Affairs Department

The Student Affairs Office serves as a liaison between students, faculty and administration. The primary function of Student Affairs Office is to be of assistance to students in any way possible. It leads, directs, and administers overall functions of student counseling, hostel residence, student societies and discipline.

The important function of Student Affairs Office is to enhance the quality of student life both in and outside of the classroom. Overseen by Dean of Student Affairs, this office is a central place for students where they can express and get help about any situation, they encounter on campus whether it is academic, personal or emotional.

The student Affairs Office provides proactive support and capacity building service to promote co-curricular activities in the Institute which could enrich our graduates at every stage of their lives as well as they could build strong relationships with their peers, faculty, administration and other stakeholders.

9.6 Student Housing

GIK Institute is a fully residential Institute. Students, faculties and most staff reside inside GIK Institute. Male students are accommodated in 11 boys' hostels while female students are accommodated in various girls' hostels.

Allotment of accommodation is done on merit basis set by the Student Affairs Department. Single rooms are allotted to the senior batch students on merit, based on availability of the single rooms.

9.7 Student Counseling Services

The Office of Student Affairs promotes a sense of community and belonging among students. The student's counselor works regularly with them to help in their personal issues. Further, they are motivated in their academic matters and encouraged how to nourish their lives with plentiful intellectual activities.

The Institute deeply appreciates the importance of stress that at times may be generated in some of the students due to various reasons.

In order to manage any COVID prompted anxiety/disruption, students will be encouraged through counselling and regular communication for bonding and apprising them about measures adopted in connection with their academic pursuits, safety and security of the campus. Support will be available via counselling service and students may send emails at sumira@giki.edu.pk. Staff has been oriented for promoting social and emotional well-being of the students. Furthermore, faculty and staff will communicate students and respond to their problems in a timely manner.

9.8 Student Societies and Clubs

GIK Institute recognizes a wide variety of student societies to facilitate diverse interests of the student body. Office of Student Affairs is the governing body for all societies that are administered by student representatives. Societies are granted certain privileges to promote student participation in a variety of physical, intellectual and recreational activities. There are many student societies in GIK Institute which support contemporary scientific and engineering perspectives as well as are devoted to advance theory and practice of their respective fields. The Institute hosts 27 student societies, most of which are affiliated with their respective national and international chapters. The academic calendar of the Institute is tightly decorated with the projects and events organized by these societies.

9.9 Central Library

The central library started in 1993 in FMCE building. It moved to its current three- storey building in 1996. Its interior design, decor, and furniture create an atmosphere of an intellectual sanctuary wherein the students and faculty can concentrate on their studies. Now its collection comprising books, eBooks, Journals, e-Journals and Audio visual materials rise to reasonable counts having 18 hours' access daily and round the clock during examination.

It also provides desktop access to different e-databases, GIK eBooks and library catalogue to all the readers at the campus on their desk. The library also provides Wi-Fi facility to access internet, a furnished seminar room that is fully air-conditioned. To share resources through inter-library loans and exchange of database information, it is electronically linked with all prominent institutions of science and technology in the country.

The physical library stock consists of over 24,500 latest books on a variety of subjects like Electronic Engineering, Engineering Sciences, Mechanical Engineering, Metallurgy & Material Science Engineering, Computer Hardware & Software, Business & Management, English Language and Islamic Literature. Leisure / general reading such as Psychology, Social Sciences, Pakistan Studies, Travel, Biographies, Fiction, Geography and History etc. are also well represented. The books other than engineering are placed in a separate Management Sciences and

Humanities Section in the library. Besides that, the library has subscriptions of weekly, monthly and annual periodicals and research journals such as Engineering Horizon, Scientific American (Monthly), The Economist (Weekly), Discover (Monthly), HEC E-recourses, IEEE Xplore etc., supported by daily newspapers and periodic magazines. After introduction of on-line lecturing in the wake of COVID-19, the students have been provided extra facility of direct access to digital library through VPN accounts opened for providing the facility to students.

9.10 GIK Alumni

GIK alumni are members of one of the most diverse, talented, and invigorating communities, cultures and connections. The Alumni Association is a gateway to this community. The Association provides services and resources that strengthen alumni's ties with GIK and each other across every stage of life and around the globe.

The Alumni Association of GIK is an independent, worldwide organization that nurtures lifelong relationships with and among current and future GIK alumni. As a committed partner of the Institute, the Association offers programs of relevance and service to alumni and creates support for the Institute. Underlying all that we do is the belief in the value of education to the wellbeing of society, and a commitment to integrity, diversity, and service.

With more than 6000 alumnus, the GIK Alumni Association represents a very vibrant alumni body of old GIKians. GIK Institute provides “valuable benefits and programs” that lets Association members tap into this vast network and stay connected. GIK Institute Alumni Association’s vision and mission statements highlight the Institute’s dedication to serving all GIK alumni. GIK alumni have access to an exclusive array of resources and discounts, including the online alumni directory, career tools and networking opportunities.

Alumni can also participate in the selection of Association leadership. Enterprise Forum members, parents of GIK students, friends of the Institute, and associate members of the Alumni Association may register for certain services, including mailing lists and the Discussion Network. Lots of alumni volunteers work directly with the Association and the Institute and many more support GIK through donations to the Annual Fund, career development seminars and workshops. The Association has the future plans to consider arranging some sort of finances also.

Below is the structure of the GIKAA Executive Council:

1. President
2. Secretary
3. Vice President Student Affairs
4. Vice President Industrial Engagement
5. Vice President Institute Affairs
6. Vice President Finance

7. Vice President Marketing

ORIC Office keeps all GIKAA records and coordinates with its President and other members of its Executive Committee.

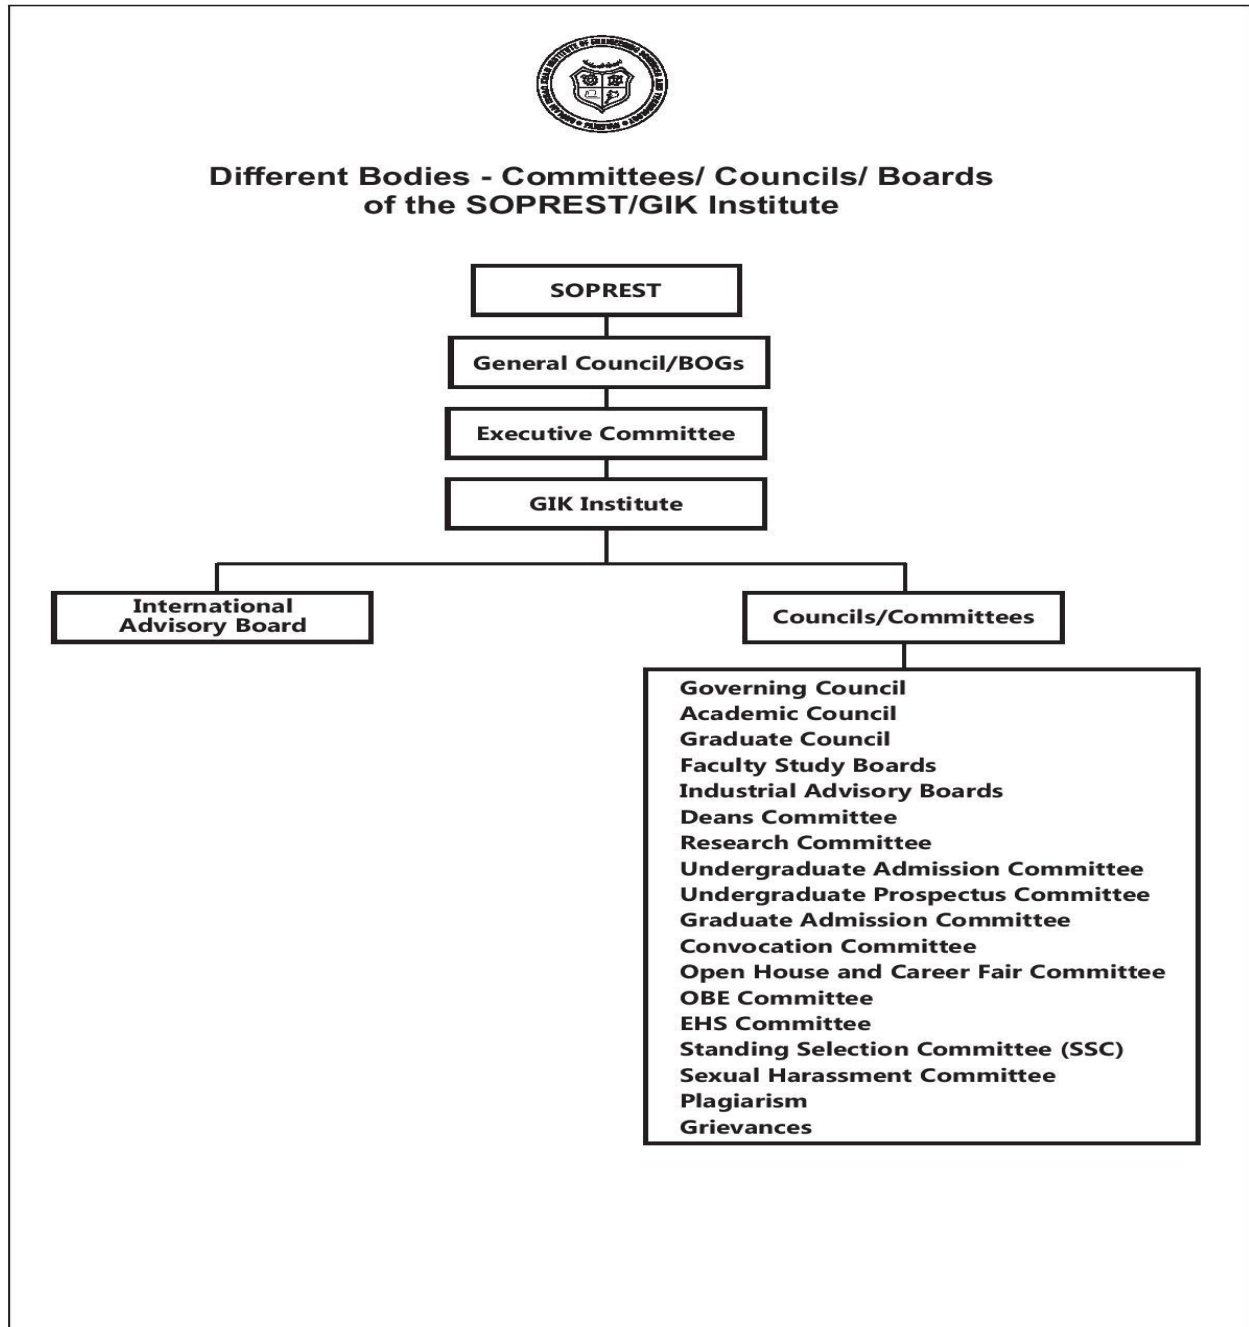

Conclusion

This Faculty Handbook will be printed and its electronic version will be placed on the official website of the Institute (<https://www.giki.edu.pk>) after fulfilling necessary formalities. The electronic version will be regularly reviewed by adding new policies, procedures and related matters by following due process of approval. Suggestions for improvement will always be welcome.

Annex-D

Leave policy

The Rector has been pleased to approve the following guidelines (instructions) for applying for and availing of leave in GIK Institute. These guidelines are circulated for observance by all concerned.

- These instructions may be called; the GIK Institute leaves instruction 1994; as amended from time to time.
- The instructions should come into force with immediate effect and shall deemed to have been enforce for each employee of any category of GIK Institute as may have been employed by the institute.
- Where these instructions are silent on the subject or required clarifications, decision of the rector shall be deemed to be final.
- Leave shall be entitlement but its grant shall be subject to exigencies of service at the discretion of the Institute. When the exigencies of service so required the sanctioning authority may refuse the grant of leave period that the reasons for such refusal/cancellation shall be conveyed in writing to the employee concerned well in time as for practicable.
- As a matter of instructions no employee shall avail himself of the leave unless he applied for the same in advance and the sanctioning authority sanctions it.
- The leave shall be expressed in terms of days.
- The leave shall be applied on the prescribed pro forma.
- Any employee who obtains leave shall apply the leave sanctioning authority through proper channel before proceeding on leave. If an employee remains away from duty without sending proper application in time, his absence will be treated as leave without pay unless there are genuine reasons to support that it was not possible to send a timely application. His absence without approval shall be dealt in accordance with the rules of discipline.
- Application for leave for more than three days should be submitted at least one week prior to the time from which the leave is required except in the cases of sickness or emergency.
- An employee availing himself of leave should inform the competent authority in writing about his address prior to going on leave.
- An employee who remains absent for four days in excess of the period of leave, shall be liable to disciplinary action unless he is able to explain his overstay in manner satisfactory to the competent authority.

- Earned leave in respect of officers and staff of the Institute shall be sanctioned by the Rector or an officer authorized by him.
- The Casual Leave shall be sanctioned by the reporting officer of the employee which shall be allowed normally for not more than 5 days at a time.
- Each Faculty/Department shall maintain proper record of the Casual Leave in respect of each employee.
- HR Department shall maintain proper record of the Earned Leave in respect of all employees of the Institute and shall process all the cases of earned leave of the employee for approval.
- Leave shall commence in the forenoon of the day.

Annex-D (1)

Sabbatical Leave

- In case a faculty member has served the Institute for a period of 6 years, Sabbatical Leave for one year comprising maximum of 120 days earned leave available. 36 days research leave and the balance period as leave without pay and allowances be granted commencing the summer break or from spring break. Sabbatical leave during mid of the semester will not be allowed.
- During this leave period, he/she may retain his/ her accommodation, if provided at campus, and avail medical facilities for his family as per rules.
- The concerned faculty member will be required to submit a detailed plan of research abroad that will be evaluated by the Research Committee and recommendations be submitted for grant of sabbatical leave. Sabbatical leave may be granted to only one eligible faculty member per year.

Annex-D (2)

Research Leave (Terms and Conditions)

- In case where an employee has one year service but have availed of fully or partly this earned leave for other reasons, thus does not have to his credit 24 days earned leave, he may be allowed research leave up to 60 days comprising 36 days leave with full pay and balance from his earned leave account to the extent of availability or leave without pay if there is no sufficient balance of earned leave and
- In case where an employee has not rendered minimum one-year service he shall not normally be allowed research leave. However, in exceptional cases, research leave may be allowed at the rate of 03 days for each calendar month with a duty period of not less than 15 days and leave with full pay to the extent of availability and remaining period as leave without pay.

The above guidelines were amended/ replaced with the following:

- The period of research leave spent during preceding summer shall also be counted as continuous service for the purpose of allowing research leaves in the ensuing summer thus allowing up to 36 days for one year service plus earned leave to the extent of availability and the remaining period as leave without pay and
- Those faculty members who join the institute during a financial year, they may be allowed @ 03 days for each calendar month with a duty period of not less than 15 days plus earned leave to the extent of availability and the remaining period, if any, as leave without pay.
- It will also be mandatory that on return the concerned faculty members shall submit a detailed report covering his/ her research activities and achievements made during research leave. These achievements will be taken into account for grant of research leave in the following year.

Annex-F

Supervision of thesis (Policy)

1. The Governing Council of the Institute in its 270th meeting held on 10th May, 2018 approved the following review policy for compensation to faculty member's for supervision of MS& PhD students and capping MS/PhD supervision effective from the Fall 2018 intake.
2. It was decided that the honorarium to a supervisor of successfully defended MS thesis will only be awarded after the acceptance / publication of an ISI-indexed impact factor paper. It was further decided that the honorarium to a supervisor of successfully defended PhD thesis will be awarded if at least two papers from the thesis have been accepted / published in ISI Indexed impact factor journals.
3. It was also decided that the maximum number of "GIK sponsored" MS/PhD students supervised by a full time faculty member at a time is six (6). This includes three (3) MS and three (3) PhD students.
4. There will be no cap under the following special circumstances:
 - a. If an MS /PhD student comes to GIK to join a specific faculty member or a research group and the student submits a declaration to the respective Dean / HoD.
 - b. If a student finds that a supervisor "X", who is specialized in the area of the student's interest, has reached the cap and there is no other faculty member available with that particular specialization, the student can write to the respective Dean, /HoD who will then allow the student to register with Supervisor "X".
 - c. If a faculty member bring in as sponsored project that includes full funded MS/PhD students(s).
5. If a faculty member brings in a sponsored project that includes partially-funded MS and /or PhD students(s), the supervisor of such student(s) will still be capped but with the following relaxation. Two (2) such students will be considered as one (1) "GIK sponsored" student for the cap.
6. The maximum number of times a faculty member can receive the honorarium for supervising MS /PhD students is also capped according to the "Supervisor cap" (Para 3). If a supervisor exceeds his/her "Supervising cap" under the special circumstances (para 4) there will be no honorarium for supervising the additional students. However, he / she may continue to supervise additional students above the cap as outlines in para 4.
7. Students' right and interest must be safeguarded. If a student wants to work with some faculty member who has already reached the cap, the student should find another supervisor of his /her own choice and expertise, Supervisors must not be imposed on students without their consent.

Annex-G

Conducting Training, Short courses, Workshop and Seminars

One should also be mindful of the commercial aspects of these professional activities. Through quality short courses/workshops/seminars, the CPD service providers can get their continuing education program well recognized and respected and with demand raising exponentially such like professional undertakings could become an important source of income. LUMS, Lahore and IBA Karachi have impressive record of commercial performance which needs to be emulated.

1. Objectives

- a. Using incentive-based approach for Resource Person, popularize the GIK's Continuing Education Program (CEP) at faster pace across the nation.
- b. Earn respectability of the GIKI's CEP among practicing professionals through superior quality of delivered services.
- c. Enhance frequency of GIKI-Industry interactions as confidence-building measures leading to such broader and deeper professional linkage through applied funded projects.
- d. Earn revenue for the Institute.

2. Methodology

- a. GIKI shall organize workshops/training/conferences like other prestigious institutions. Employees of the Institute may be encouraged to conduct such training, short courses, workshop and seminars, hereinafter to be termed as "Program" which are in line with the objective of the Institute and result in benefits to the Institute.

Provided that such programs do not interfere with the employees, primary duties of teaching and research at the Institute.

- b. The proposal of a program shall be initiated by the Principal Resource Person through concerned Dean/Pro-Rector (A) for approval of the Rector after vetting by the Pro-Rector (A&F) which shall inter alia contain:
 - Title of the program
 - Name of the Principal Resource Person and others involved
 - Proposed date of commencement and the duration
 - Brief write-up of the Program to be conducted
 - Budget estimate
- c. Budget estimate of the Program shall be prepared by the Principal Resource Person and submitted through concerned Dean/Pro-Rector (A) duly vetted by Pro-Rector (A&F) for Rector's approval.

- d. The budget estimate shall inter alia include the following:
- Cost of direct materials required for the program
 - Other costs/expenses/overheads for various services provided by the GIK Institute not limited to accommodation, transport, food, etc. plus cost of advertisement, if any
 - Expected revenue
- e. While making provision for the overheads, Resolution No. 16 adopted by the members present in the third meeting of the Board of Governors of the GIK Institute held on Tuesday the 10th March, 1998 chaired by Mr. Ghulam Ishaq Khan shall be made to cover the following:
- a. depreciation charges for the use of Institute's equipment including the depreciation of the non-deliverable items, if any, purchased for the contract/assignment;
 - b. depreciation charges for the use of furniture and fixtures of the Institute;
 - c. depreciation charges for the building (rent for the use of office space);
 - d. depreciation charges for the use of computer equipment;
 - e. cost of indirect services (charges for services of the support staff of the Institute);
 - f. telephone and fax charges;
 - g. printing and stationery expenses;
 - h. lighting, heating and air-conditioning charges;
 - i. rent for the use of scientific and technical book, journals, periodicals and other library materials;
 - m. office supplies;
 - n. workshop courier charges;
 - o. postage, courier charges;
 - p. E-mail and internet charges, and many other miscellaneous expenditure.
- f. Overheads shall be charged to various programs on case to case basis which as per Resolution No. 16 referred in the previous clause, was approved not to be less than 40% of the total approved estimated cost of the program. However, to achieve the objectives defined in this proposal the percentage is mended to 20% to be applied on the cost excluding compensation to the faculty/resource persons and share of GIK Institute on saving to be shared with faculty/resource persons and the Institute.
- g. A lump sum fee/charges for each Program shall be worked out and proposed by the Resource Person and submitted through Dean/Pro-Rector (A) for Rector's approval in consultation with the Pro-Rector (Admin. & Finance).
- h. Once approved, Program will be advertised on the Institute's website. Other IT resources using various contact groups will also be used for wider publicity. The Alumni of GIKI shall be contacted to encourage their own participation as well as to promote the program in their respective organizations. Those organizations having direct relevance to the

Program may be contacted through written communication wherein salient features of the Program shall be highlighted.

- i. The Principal Resource Person of a Program in consultation with concerned Dean, may offer some incentive for multiple registrations of any single organization.
- j. If a Program is required to be conducted on resource-sharing basis with an organization outside GIKI, the Principal Resource Person, in consultation with the responsible representative of the participating organization, will develop a proposal clearly referring the role of each organization. The proposal shall include the duties of each participating organization and its concerned individuals along with breakdown of financial compensation. Such programs will be approved on case-to-case basis by the Rector on the recommendation of concerned Dean/Pro-Rector (A)/Pro-Rector (A&F).
- k. GIKI has signed MOUS with several organizations which may have made system to Continuing Education Program of the Institute. In such cases, the same clause of MOU shall be involved for relevant action/decision.
- l. The fee/charges/funds are payable to the Institute by crossed cheque drawn in the name of GIK Institute of Engineering Sciences and Technology.
- m. A certificate shall be given to each participant of the Program carrying weightage of earned credit points.
- n. Final Report of every program shall be prepared by the Resource Person on completion of the program and submitted along with the proposal for disbursement of compensation to the Rector for approval.

3. Financial Compensation

To ensure success of the GIKI's Continuing Education Program and its rapid growth, better incentive is being offered to the Resource Persons. After deduction of all program-specific expenses, the balance amount shall be shared by the Principal Recourse Person and the GIK Institute on 70:30 basis, respectively.

The Principal Recourse Person from his 70% share shall compensate other technical, secretariat and support staff. As the Income may vary from Program to Program, the faculty members involved in delivery of the Program shall get compensated for their hourly involvement using the following ratio:

• Principal Resource Person	:	1
• Resource Person of the rank of Prof/Assoc Prof	:	0.8
• Resource Person of the rank of Assist. Prof	:	0.6
• Resource Person of the rank RA	:	0.4

The secretariat and other supporting staff shall be compensated as follows:

• Lab Engineer or equivalent	:	Rs. 1,000/day
• PA or equivalent	:	Rs. 750/day
• Attendant or equivalent	:	Rs. 500/day

4. A specimen of financial summary of work shop as a sample is below:

Financial summary of Workshop Revenue & Expenses: A Sample

Resource Person	Dr. Muhammad Akbar
Designation	Professor
Department	Faculty of Electrical Engineering
Course Title	Understanding Artificial Pollution Testing of High Voltage Insulator to Design Power Transmission and Distribution System in Pakistan
Schedule	To be announced
Number of Participants (Expected)	25
Course Duration	05 Days
FEE	Rs. 50,000/- Participant

Revenue

Single Participant	For 25 Participants
Rs. 50,000	Rs. 1,250,000

Expenses

Accommodation	Rs. 10,000/- person (GIK Accommodation for 5 days @ Rs. 2000/person/day.) (Double Occupancy)	Rs. 250,000
Food	Rs. 700/day/person	Rs. 87,500
Certificates, Folders, drafting pads, participant cards etc.	Rs. 700/person	Rs. 17,500
Transport charges		Rs. 20,000/-
Sub Total		Rs. 375,000/-

Marketing Charges

IT Department	Rs. 10,000
Mailing and photo copying	Rs. 1,250,000

5. Validity

This policy of GIKI's Continuing Education Program shall be effective from 1st November, 2017 for an initial period of two years. It shall however, remain valid even after two years for any such time till it is modified or replaced by a new policy.

Annex-H

Plagiarism Policy of the GIK Institute

The Standing Plagiarism Committee shall consist of the following members to be nominated by the Pro Rector (Academics) with the approval of the Rector.

1. Three (03) senior faculty members (with no more than one from the same faculty) one of whom shall be appointed as Convener by the Pro Rector (Academics),
2. One faculty member from the concerned faculty (subject expert) having an academic rank no less than the rank of the person being accused to have plagiarized,
3. One senior student (in case a student is accused) from the concerned faculty,
4. One nominee of HEC or some other HEI.

The members of the standing committee MUST be active researchers having recent publications either as first author or as supervisors where their supervised student is the first author. The members of the committee are to sign a confidentially agreement not to disclose any information as described in para 8 of the HEC plagiarism guideline.

Terms of References for the Standing Plagiarism Committee.

The members of the committee shall investigate the accusation of plagiarism in a fair, free, transparent, and timely manner. The committee shall establish whether the accusation of plagiarism is established or not, and the extent to which the allegation has been found (if established), i.e., whether minor, moderate, or major.

In order to establish the allegation of plagiarism, the committee shall be guided by the following (non- exhaustive):

- Establish whether the author(s) have laid a claim to the published material, for instance, by listing it on their webpage, seeking monetary compensation, listing in ACR, or any other such list, organization, etc.,
- Establish whether the paper/thesis/technical report/proposal from which the author(s) are alleged to have plagiarized is verifiable and has been published/archived/presented/etc. before the alleged claim of plagiarism,
- Conduct an automated plagiarism test (e.g., using Turnitin software),
- Conduct a manual plagiarism examination for verbatim copying, paraphrasing, and plagiarism related to significant scientific ideas and/or data (including datasets),
- Establish, if in doubt, the source of the technical data obtained. For instance, authors claiming to have generated their own data where such an equipment is not available at the Institute,
- Consult other relevant sources like author's past supervisors, organizations, co-workers, etc.,
- Interview witnesses or potential witnesses,
- Solicit comments from the Editors or Technical Program Committee members of journal/conference where the alleged plagiarized document has been published,
- Seek legal counsel from the Institute's legal advisor, if necessary,

- Other such actions as guided by the HEC's guideline for plagiarism and as deemed necessary and appropriate by the committee within a professional working environment, without causing unnecessary difficulties or defamation or embarrassment to anyone including the author(s) "alleged" of conducting plagiarism.
- Interview or seek material from the person making the accusation to help establish the claimed plagiarism.

The committee shall provide a fair chance to the author(s) accused to present their defense and justification. The committee shall, at all times, be guided by the HEC's policy on plagiarism which might be updated from time to time and remain within accepted professional and ethical norms. To ensure fairness, the committee:

- SHALL provide an opportunity to the accused, including in writing, to present their justification defense to allegations against them and such written response MUST be included in the final report.
- SHALL gather evidences during the investigation which are to be documented and compiled in a formal report, duly signed by all members.
- Shall, in the case of a student's thesis, lay the primary responsibility on the student and not the supervisor or members of the supervising committee. If the supervisor is found as wholly or partly responsible, this may be taken up as a separate matter by the Institute.
- Determine the extent to which each of the accused has committed, if any, an act of plagiarism and document its severity.

An interim report may be submitted within forty-five (45) days, if necessary, and a final report in no more than sixty (60) days. The report shall be submitted to the head of the university (Rector), through the offices of Dean Graduate Studies and Pro-Rector (Academic), confidentially, for further necessary action or onwards submission to HEC and/or others concerned.

Penalties

In case the act of plagiarism is conclusively proven, the Committee shall recommend, depending on the severity of the infringement a penalty or penalties for the approval of the Rector, which may include, but not be limited to:

- Dismissal from service, or expulsion in the case of a student
- Demotion (in case of a faculty member)
- Suspension
- Bar on holding any office
- Prevention from supervision of graduate students (in case of a faculty member)
- Withdrawal of degree (in case of a student)

(Attention is also invited to the "HEC Plagiarism Policy"
<http://www.hec.gov.pk/english/services/faculty/Documents/Plagiarism/Plagiarism%20Policy.pdf>)

Annex-I

Sexual Harassment Policy

Government of Pakistan has approved the Act titled, "Protection against Harassment of Women at the workplace Act, 2010. The purpose is to provide safe and secure working environment to the working women in the public and private sector. The intention is to provide an opportunity to all organizations, institutions, public, private and civil society to develop a self-regulatory mechanism whereby organizations/institutions can handle the problems related to sexual harassment internally.

To ensure implementation of this Act in its true spirit Government has made it mandatory for all public and private sectors including educational institutions to adopt a "code of conduct" in their institutions.

GIK Institute believes in fostering safe and secure working environment free from intimidation, specifically for working women and female students, and has, therefore, adopted a Code of Conduct and constituted a Harassment Complaint Cell in the Institute.

The salient features of the Code and composition of the Cell and its functioning are given below.

Policy Statement

The Code is for all employees, students, women and men and puts the responsibility on the management to make the organizational environment safe and secure and free of sexual harassment. According to the law the institutions can deal with sexual harassment cases within the institution.

Sexual harassment is prohibited at Ghulam Ishaq Khan Institute of Engineering Sciences and Technology (GIK Institute) and constitutes a punishable offence under the sexual harassment policy.

Sexual harassment is a serious human rights issue. It can be exacerbated by discrimination on other grounds of vulnerability such as gender, poverty, disability, race, religion, ethnic origin or sexual orientation.

Sexual harassment subverts the mission of the GIK Institute and threatens the careers, educational experience, and well-being of students, faculty, and staff. The Institute will not tolerate sexual harassment, nor will it tolerate unwelcome behavior of a sexual nature towards members of the community at when that behavior creates an intimidating or hostile environment for employment, education, on-campus living, or participation in activity of any nature within the premises of the Institute.

Sexual harassment is especially serious when an instructor harasses a student, or a supervisor harasses a subordinate. In such situations, sexual harassment unfairly exploits the power inherent in an instructor's or supervisor's position. However, while sexual harassment often takes place in situations where there is an abuse of a power differential between the persons involved, the Institute recognizes that sexual harassment is not limited to such situations. Sexual harassment can occur when a student harasses an instructor, when a subordinate harasses a supervisor, or between persons of the same status.

All the actions categorized as sexual harassment when done physically or verbally would also be considered as sexual harassment when done using electronic media such as computers, mobiles, internet, e-mails, etc.

What is Sexual Harassment?

Sexual harassment means persistent, repetitive, or egregious conduct directed at a specific individual or group of individuals that a reasonable person would interpret, in the full context in which the conduct occurs, as harassment of a sexual nature, when:

- a) Submission to such conduct is made or threatened to be made explicitly or implicitly a term or condition of employment, education, on-campus living environment, or participation in the Institute activities; or
- b) Submission to or rejection of such conduct is used or threatened to be used as a basis for a decision affecting employment, education, on-campus living environment, or participation in the Institute activities; or
- c) Such conduct has the purpose or effect of unreasonably interfering with work or educational performance, or of creating an intimidating or hostile environment for employment, education, on- campus living, or participation in the Institute activities.

Examples of Harassment

Behavior that may constitute, or be evidence of, prohibited sexual harassment includes, but is not limited to, the following:

- a) Physical assault;
- b) Direct or implied threats that submission to sexual advances will be a condition of, or that failure to submit to such advances will adversely affect, employment, work status, promotion, grades, letters of recommendation, or participation in the Institute's activity;
- c) Direct propositions of a sexual nature or persistent unwelcome efforts to pursue a romantic or sexual relationship, including subtle pressure for sexual activity, an element of which may be repeated staring;
- d) A pattern of unwelcome sexually explicit gestures, statements, questions, jokes, or anecdotes, whether made physically, orally, in writing, or through electronic media;
- e) A pattern of unwelcome conduct involving:

- Unnecessary touching;
 - Remarks of a sexual nature about a person's clothing or body;
 - Remarks relating to sexual activity or speculations concerning previous sexual experience; or
 - Stalking another person who reasonably perceives the stalker is pursuing a romantic and/or sexual relationship. Stalking of a sexual nature that is directed at a specific person that would cause a reasonable person to feel fear.
- f) A display of graphic sexual material (not legitimately related to the subject matter of a course, if one is involved, or to job requirements) in a context where others are not free to avoid the display because of an employment or educational requirement or without surrendering a privilege or opportunity that others may reasonably expect to enjoy in that location;
- g) Domestic/dating violence, which constitutes coercive, abusive, and/or threatening behavior toward a current or former intimate or romantic partner. These behaviors may include physical, sexual, emotional, economic, or psychological actions or threats of actions that intimidate, manipulate, humiliate, isolate, frighten, terrorize, coerce, threaten, or injure the victim/survivor.

Who Can Experience Sexual Harassment?

Direct targets

- Students
- Employees
- Volunteers/interns

Indirect targets

- Bystanders
- Witnesses

Harassment Complaint Cell

To ensure that the workplace is free from all forms of harassment and the work environment is more professional and dignified, GIK Institute has established a Harassment Complaint Cell (HCC).

Objectives of HCC

The primary purpose of the HCC is to facilitate the policy implementation in letter and spirit where complaints of sexual harassment or any other forms of harassment could be lodged. This would require a team consisting of a full time, designated Harassment Monitoring Officer – HMO -- (gender sensitized, with strong professional and counseling skills), and an assistant who could follow up the documentation through relevant offices.

The HMO shall be an employee of the GIK Institute. He/She will be appointed by Rector where he/she is responsible for the application of this policy as herein defined. To this end, the Officer will, in consultation with the Institute's authorities, promote awareness of sexual harassment, foster an environment free of sexual harassment in the Institute's community, and will help carry out complaint resolution. He/She will have a minimum experience of 10 years of service within the Institute and bear sound reputation. The details regarding the general procedures for action by HMO are described in the Policy Guidelines against Sexual Harassment in Institutions of Higher Learning, page 11.

Confidentiality shall be enjoined on the HCC members. This does not preclude the discrete disclosure of information in order to elicit the facts of the case, or to implement and monitor properly the terms of any resolution.

Furthermore, it is the responsibility of the HCC members, to respond fairly to the complainant, the respondent, and any other parties to proceeding, under this policy.

The HCC shall have the following members:

1. A senior female faculty member to be appointed by the Rector
2. A female faculty member of the rank of Research Associate or Asst. Professor to be appointed by the Rector in consultation with the Pro Rector (Academics)
3. A female non-faculty employee of the rank of Assistant Director or above, to be appointed by the Rector in consultation with Pro Rector (Administration and Finance)
4. Harassment Monitoring Officer (HMO)
5. Director HR or his/her nominee not below the rank of Assistant Director (Where a female nominee is not available, a male substitute may be appointed till such time that a female nominee becomes available)

How to Register a Complaint?

Informal Complaint

The steps of launching an informal complaint are as follows:

1. An Employee/student can lodge a verbal complaint either to his/her Supervisor/ head of the department or any one of the HCC members.
2. The person receiving the complaint can take an informal action to resolve the issue.

Formal Complaint

The steps of launching a formal complaint are as follows:

1. Employee/student can lodge a written complaint directly to any of the HCC members OR they can submit a written complaint to his/her supervisor/head of the department who will forward it to HCC

2. Acknowledgement by the person receiving the complaint
3. HCC shall communicate an allegation statement to the accused in writing within 3 days
4. Accused to respond in writing within 7 days
5. Ex-parte decision by committee if no response from accused

HCC Proceedings

The HCC should proceed with the complaint as follows:

1. Completion of process within 30 days.
2. Submission of recommendations to Competent Authority. Implementation of the decision, within 7 days of receipt of the recommendations, by the Competent Authority. In case the Competent Authority disagrees with the recommendations, he/she shall record his/her reasons.

Confidentiality shall be enjoined on the HCC members. This does not preclude the discrete disclosure of information in order to elicit the facts of the case, or to implement and monitor properly the terms of any resolution.

False Allegation

Allegations of sexual harassment made out of malice or intent to hurt the reputation of the persons against whom the complaint is filed are to be dealt with as serious offences. Making mala fide allegation of sexual harassment, knowing it to be false, whether in a formal or informal context, is a serious offense under this policy and action would be taken under the Institute's disciplinary regulations.

Any charge found to have been intentionally dishonest or made in willful disregard of the truth, and to malign or damage the reputation, however, will subject the complainant (student, staff or faculty) to severe disciplinary action.

Withdrawal of a false complaint after a wide dissemination of, or publicity of the purported offense, carried out intentionally to malign the character of the person accused, and done with willful intent to cause physical, psychological or mental harm or stress, has to be dealt with more serious penalties **and a complainant should be entitled for the same punishment as for the accused.** This will ensure that no injustice is meted out.

Education for Prevention of Sexual Harassment

To ensure prevention of sexual harassment on campus the GIK Institute will develop programs to educate and counsel its staff, faculty and students as well as provide written material for reference. Education is essential to sensitizing the Institute's faculty, staff and students in order to eliminate sexual harassment on campus. GIK Institute will develop an ongoing training program in this regard. Completion and participation of the training program is to be made a requirement for all those who enter employment or services. Further, notices be placed by the

authorities regarding its policies. The Student Advisor in each faculty/department may disseminate information about these programs, what constitutes sexual harassment, how to respond to it and what to do when someone asks for advice about sexual harassment.

(Attention is also invited to the “Policy Guidelines Against Sexual Harassment In Institutions of Higher Learning”. <https://www.muet.edu.pk/sites/default/files/Large%20Book.pdf> and

“Harassment Act 2010 At Work Place”,

Annex-J

Grievance Committee

Grievances Committee:

The composition of Grievances committee is as under:

1. A senior Professor to be appointed by the Rector
2. An Assistant Professor to be appointed by the Rector
3. Director Finance
4. A Female Faculty/Staff Member to be appointed by the Rector
5. Assistant Director HR

Terms of Reference:

- a. To ensure fair and transparent treatment of all faculty members across faculties/departments
- b. To allow faculty members to voice their grievances in a professional manner
- c. To report the grievances of the faculty to the appropriate departments
- d. To supervise disciplinary procedures and actions across faculties to ensure fairness of process and judgment
- e. To liaise with Faculties/Departments in relation to faculty grievances
- f. To conduct surveys (and, other forms of research) on employee satisfaction, commitment and other indicators of employee performance with the help of ORIC
- g. To work closely with the HR Department in order to develop strategies and procedures to reduce faculty grievance
- h. In case there is a grievance against a committee member, the committee member will be replaced by a new member from the same faculty on the concerned matter.
- i. The Committee members will be changed every two years
- j. To deal with all other matters related to faculty grievance

Annex-K

Conflict of Interest Committee

Conflict of Interest Committee:

The composition of committee for Conflict of Interest Policy is as under:

1. Director A&E
2. Assistant Professor to be appointed by the Rector
3. Director Finance
4. One Research Associate to be appointed by the Rector
5. Assistant Director Students Affairs
6. Legal Advisor

Objectives:

1. To recognize and disclose activities that might give rise to conflicts of interest or the perception of conflicts and to ensure that such conflicts are seen to be properly managed or avoided.
2. To ensure that governance of the University is conducted with close regard to the risks of financial and non-financial conflicts of interest.
3. To put in place the procedures for conflicts of interest to be identified and managed in compliance with the relevant professional, legal, ethical and regulatory standards on conflicts of interest;
4. To ensure that activity is avoided in cases where a conflict of interest cannot be managed.
5. To ensure that all staff and students are aware of the importance of compliance with the Policy and that compliance with the Policy is monitored.

Committee for Intellectual Property and Copyrights

The committee for Intellectual Property and Copyrights policy are as follows:

1. Director ORIC
2. One Associate Professor to be appointed by the Rector
3. Two Assistant Professors to be appointed by the Rector
4. One Research Associate to be appointed by the Rector
5. Legal advisor
6. Director Incubation

Objectives:

- To establish a clear and sound framework for the encouragement of invention, innovation, creative work and technological development;
- To protect the traditional rights of individuals with respect to the products of their intellectual endeavors;

- To set out a framework to protect the creative efforts of the University and its employees and students, and economic and other investments made by the University;
- To protect the interests of the University, including ensuring that the use of the University name and insignias is accurate and appropriate, and ensuring that the University receives appropriate value in the commercial development of its intellectual property.

Public Disclosure and Transparency Policy:

The committee for Public Disclosure and Transparency Policy are as follows:

1. Director Finance
2. Director A&E
3. One Research Associate to be appointed by the Rector

Objectives:

1. To ensure external communications are handled in a manner that enhances public confidence.
2. To ensure that material information is not released on a selective basis.
3. To provide all employees with clear rules and guidelines with regard to trading the Institute's securities.
4. To ensure consistent application of the policy across the Institute's operations.

This particular document has been improvised from Dean Graduate Student Office document “***Student Development in GIK Institute***” with more focus on the activities and functions related to the faculty that may help both faculty and students to get maximum out of their academic activities.”

Section 1 Introduction

The GIK Institute is a fully residential campus. The faculty, students and almost all other employees stay on campus. Perhaps the GIK Institute is the only academic institution in Pakistan that offers such a facility to its students and employees. This, on one hand, provides a unique learning opportunity to the students and an excellent research environment to the faculty, but, on the other hand, poses various challenges to the students as most of them are away from home for the first time. Students face a number of challenges while they join the Institute. Therefore, faculty members get an additional responsibility outside the classroom to groom and guide these students throughout their academic career.

This particular document is improvised from Dean Graduate Student Office document “Student Development in GIK Institute” with more focus on the activities and functions related to the faculty that may help both faculty and student to get maximum out of their academic activities.

Faculty Member Role of Academic Adviser

The purpose of academic advising at the GIK Institute is to guide and provide information to students about their academic processes and challenges. At the time of orientation, students may need just the schedule of classes, but as time passes by they move to next semesters and they may need various pieces of advice on what subjects to choose, how to manage graduating requirement, what majors and minors to choose, how to explore career path etc. Academic advising provides guidance in these issues so that students may take the right decision at the right time.

Academic Advising Process

“Academic advising is a developmental process which assists students in the clarification of their life/career goals and in the development of educational plans for the realization of these goals. It is a decision-making process by which students realize their maximum educational potential through communication and information exchanges with an advisor; it is ongoing, multifaceted, and the responsibility of both student and advisor. The advisor serves as a facilitator of communication, a coordinator of learning experiences through course and career planning and academic progress review, and an agent of referral to other campus agencies as necessary” (Crockett, David S., (ed.), *Advising skills, techniques and resources: A compilation of materials related to the organization and delivery of advising services*. ACT Corporation, Iowa City, Iowa, 1987)

The following has been excerpted from *Burns Crookston's Journal of College Student Personnel*, volume 13, pp. 12-17.

"Developmental counseling or advising is concerned not only with a specific personal or vocational decision but also with facilitating the student's rational processes, environmental and interpersonal interactions, behavior awareness, and problem-solving, decision-making, and evaluation skills"

Academic advising facilitates student development. Academic advising involves advisees' learning more about three major components and the interrelatedness of these three components in making well-suited academic, career and life goals, plans and choices. The three major components are the self, the college environment, and the environment that is external to the college.

The component of the self involves the students examining their values, personalities, cultures, likes/dislikes, strengths/challenges, skills, attitudes and beliefs. Successful students will learn more about each of these aspects of the self and they will become aware that they are in a constant state of evolution, creating the need for their evaluation, and the reevaluation of the self. In effect, students should learn means by which they can maintain a sense of 'self' throughout the life span.

The second component, the college environment, involves students learning how to navigate themselves through their academic careers, becoming aware of the purposes of higher education, seeking diverse and challenging educational and social experiences, using available resources, making well-informed decisions regarding their academic career, and developing a regard for lifelong learning.

Understanding the Transition of the Students

Why do some undergraduates feel they are making the most of their years at college, while others are far less positive? What choices and attitudes distinguish between these two groups? What can an individual student do, and what can any college do, to improve the chances that on graduation day the student will say, "I really got what I came here for"?

(p. 1, Making the Most of College, Richard J. Light, Harvard University)

The transition to college involves many changes which significantly improve student's personal, social and academic life, and students must understand that it might take time to adjust to these changes.

GIK is considered a boarding Institute because most of the students might have to stay on campus during their academic years, and it might be the first time that students are living away from their families where parental guidance and advice were readily available to student. Here, students have to learn to manage their academic, social, and personal matters without support structures, which students have left behind. Students have to realize; university life is totally different from school life.

Section 2 Freshmen Challenges at GIK Institute

There are certain choices that students make at college. Some students make these choices carefully and purposefully, while others make them haphazardly, with little thought and planning. The consequences often are intense.

(p. 3, Making the Most of College, Richard J. Light, Harvard University)

In the transition to university, there are perhaps three main factors which influence the student's life at campus, they are academic adjustment, social adjustment, and emotional adjustment.

- Academic Adjustment implies how well students deal with their academics.
- Social Adjustment is when students engage themselves in the process of individualization from their families.
- Emotional Adjustment is when students have depression during their academics and usually depression is common in freshmen.

Following are the main challenges that freshmen might face at GIK Institute:

2.1 Increased Pace of Academics

Students admitted to GIK come from various academic backgrounds. Most of them are either from the Pakistani Intermediate/Matriculation or the British GCE examination system. Students from intermediate or British GCE examination system are used to have examinations after 1, 2 or 3 years; and most of them are not used to be attentive in the classes because they rely on tuitions and have a mind to prepare everything near the exams because they are not used to being tested on their learning of subject matter on a regular or weekly basis. On the other hand, material at university is covered much faster and it is tested on regularly, weekly, and quarterly basis in the shape of quizzes, assignments, midterms, projects, and final examinations. In the GIK Institute, a semester comprises 16 weeks, but the last week is allocated to the final examinations. Students are evaluated by mid-semester test, home assignments, quizzes, case studies, course projects, laboratory reports, oral tests, and end-term examination.

2.2 Increased Level of Academic Difficulty

University level courses need not only be covered faster than school studies but also demand more attention and engagement because university level courses are conceptually more advanced and challenging. Furthermore, at university level, students cannot expect that everything will be examined as it is given in books and references. Also, there are various methods which are used to assess the students. Examination might be conducted in practical or theoretical form, so students need to resolve their queries about concepts. They need to be regular in their classes as well as cover the prerequisites before attempting a course of higher level.

2.3 Social Support and Adjustment

Social support is one of the most important protective factors for freshmen, because when they come to the GIK Institute they find an entirely unfamiliar environment and they have to develop their social relationships with the people and the environment. The GIK is an Institute where freshmen find much greater cultural, geographical, and social diversity of people and at some time they feel that this place is quite impersonal and cold. Some freshmen also feel that GIK's norms and social life are quite strange and unusual. Freshmen who feel a sense of alienation at the GIK Institute, and find it hard to connect with their peers are at risk of feeling isolated, lonely and homesick. This impaired social adjustment adversely affects their concentration on academics.

2.4 Increase of Independence Level

When freshmen come to the GIK Institute, their responsibilities increase in the sense that not only they have to concentrate on their studies, but also have to take care of themselves. Many responsibilities are added to their life. They have to maintain their academic grades, and need to take ownership of every aspect of their life here including social, residential and personal aspects of life. Students take time to adjust with these personal responsibilities, and it depends upon them what methods they use to cope with these responsibilities, and how much time they take to adjust with them. While the ability to deal with this increased independence is an essential element of personal development and maturation process during university life, some students will face some trouble managing the greater freedom that university life offers. This may become evident when they fail to correctly prioritize the different aspects of their lives here. When that happens, time management suffers, and academic performance is affected.

2.5 Strong Competition

The GIK Institute is considered as one of the best engineering Institutes in Pakistan. Here, students are admitted who are considered the accomplished students of the best Pakistani schools. This feeling of being special because of their achievements will be tested when those students come to the GIK and see that almost everyone here is either as accomplished as they are or there are some who have performed better than they did at school. Due to this reason, some students are discouraged, but the others take it as a strong challenge, and they prepare themselves to compete at a larger level where a lot of multitalented students are their competitors, and the standards of evaluation are also different than schools. Learning from the success of others and drawing inspiration from them is a mature and growth-oriented response to competition.

Section 3 Faculty Contribution

In this section, a brief description is given for some contribution that faculty members can make towards students in general and the freshmen in particular to help them get maximum out of their academic career at the GIK Institute.

Areas of Contribution

Students at the GIK Institute, in particular the freshmen, face a big challenge of time management. The major reason for it is that students do not quickly realize that their parents are not around to wake them up and remind them that they are getting late for the class. Even in the class, most of the instructors even don't know that a particular student is present or absent especially in larger classes. Subjects are taught with an increased pace. Even if it is curfew time at hostels, a student is free to dance the night away inside his room and sleep in when he pleases. Most of the students don't realize that their grades are slipping away, and they are distancing themselves from their goals.

Faculty, as an advisor, can play a vital role here. They may guide the students on time management and the specific issues they are facing in particular during the first few weeks of their first year. The faculty may help in number of ways, some of which are listed below:

- i. Helping in transition period
- ii. Time management guidance
- iii. Helping students in semesters, weekly, and daily activities
- iv. Guidance in creating "To-Do List"
- v. Helping students to avoid "time wasters" activities
- vi. Being more effective in academic activities
- vii. Attaining academic goals
- viii. Maintaining balance in life
- ix. Study skills development
- x. Student reading material and recommended book-readings
- xi. Study in groups
- xii. Balance in society participation/membership
- xiii. Guidance for examination
- xiv. Any other help that may make students more effective

Annex-G

Effective Practices and Strategies for Enhancing Students' Learning

Encourage students to teach and Encourage teachers to learn Anonymous
There is no substitute to lifelong learning autonomously.

Introduction:

About this report:

Most of the ideas and recommendations in this report are based on the research and insights of experts in the field of education. However, the material in this report is in no way exhaustive. Interested faculty members can expand their horizon by delving deeper into literature and read more about what teachers do in the class room, how do they do it and what should they do to be more effective as teachers. After all, there are millions of fellow teachers in the world involved in teaching and learning and many of them share their experiences via writing in books, newspapers, magazines, blogs, using videos in you tube, and on TVs etc.

It must be pointed out that this report significantly differs from what one typically finds in teacher training workshops. Five areas which are usually skipped in traditional teacher training workshops and which lie at the heart of the learning process are worth mentioning:

- 1) Our focus here is on facilitating learning that sticks (stays longer in the memory)
- 2) We are stressing on shifting the paradigm from “Instruction on campus to Learning on campus
- 3). We advise teachers to measure the impact of their teaching on students learning in real time during the class and find out if the students are learning from them. We believe most teachers overestimate the impact of their teaching on students learning in the class room. As a matter of fact, the teacher can teach and teach it well in the class room but it does not mean that students learn from them! Since the impact of teaching on students learning is not usually measured formatively in real time most teachers do not notice that there is disconnect between teaching and learning. And the result is obvious in the form of not enough learning even if the teacher performs to the best of his/her ability!
- 4). We emphasize that teaching and learning be based on sound learning theory. Without such theories teaching and learning activities are wrapped in a set of home-spun techniques and shaped by the recall of how these teachers were taught when they were students. Such strategies are not rational, and one should not expect improvement in learning using “teaching as taught”. Later in this report we discuss some useful models and theories of learning such as Information Processing, Constructivism, and Cognitive load theory.
- 5). We highlight the importance of prior knowledge (**PK**), working memory (**WM**), and the retrieval of prior knowledge (PK) from long term memory (**LTM**) in the learning process.

Long Term Memory (LTM) is the part of the brain where all learning (formal and informal) is encoded and stored. This stored knowledge is called prior Knowledge (PK) or background knowledge. When new information is received by learner as by hearing or seeing (audio and visual signals) from the environment the learner recalls prior knowledge (PK) from LTM into working memory (WM) where PK interacts with the new information. The purpose of this interaction (processing the information in the WM) is to make sense of the new information and encode it for eventual storage in the LTM. The interaction between new incoming information and the PK recalled from LTM takes place in Working Memory (WM) has its limits which if crossed will overload the capacity of the working memory of the learner. Experts advise teachers to avoid overloading the limits and capacity of the working memory of students while delivering lectures. Unfortunately, most teachers do overload the WM of students and the result is that students with WM overloaded fall asleep on their seats or are not engaged in the lecture anymore.

A. The demand for learning is rising

The demand for learning is rising due both to the ever-changing nature of the current jobs and jobs which have not been created yet. More and more knowledge, higher order soft and hardware skills and respect for global values are required of university graduates. Employers are spending huge amount of money for training their employees. Therefore, a habit of lifelong learning is required of graduates so that they can learn on the jobs lifelong on their own. Learning has become the most sought-after commodity in the face of the 4th industrial revolution currently in progress.

The foregoing discussion show that enormous changes are taking place in the profession of teaching and learning, and teachers cannot afford to sit on the side line and passively watch the changing landscape of their profession. In this report, we discuss teachers and the function they perform on daily basis and recommend best practices for improving teachers' performance in teaching which in turn will enhance the learning of their students. Just as lawyers learn in the court room and doctors in the hospital, teachers are expected to learn in the class room.

Knowledgeable and skilled people in general seem to be in short supply for jobs which already exist let alone jobs which are yet to be created in future. The price of skilled people is rising and you have to compete globally to catch hold of such people. Consequently, hiring the best meritorious people from such a small pool has become a big problem for consumers of knowledge and skills. Under these conditions, one is forced to hire those who are available, not those who are qualified.

B. Learning at educational institutions is declining.

Declining trend in learning was documented by World Bank in its report “**Learning Crisis in Global Education**” in 2018. The report shows concern about millions of kids who do not have

access to education but at the same time points to the problems of kids who do go to school, attend classes, and pay the cost but do not learn enough meaningful and relevant material.

To enhance learning in educational institutions, most of them focus on inputs such as:

Raise education budget, Hire more teachers, Increase salaries, Improve teacher recruitment methods, Build more buildings, Revise curriculum, Build larger libraries, Build more universities, Distribute more text books and laptops, Arrange more teacher training workshop, Involve more NGOs

Experience and a comprehensive study by John Hattie from New Zealand show that most of the above inputs do not enhance learning in proportion to the resources spent on them. The major shortcoming of such interventions is that teachers and policy makers do not focus on the output i.e learning and its authentic assessment. The impact of teachers' teaching on students learning is not properly addressed and for this reason informed decisions are not made.

Did any teacher or policy maker look into how much learning was enhanced when there was a raise in the budget or salary of teachers or change in the class size? Woodrow Wilson center in its report "Pakistan Crisis in education" in 2016 concluded that miss-spending, not less spending of resources is the problem in education in Pakistan. Measuring the output in terms of enhancing learning in response to increase in input seems to be conspicuously missing

In the light of the World Bank's report referred to above, we were naturally inclined to focus on how to enhance learning in the class room, specifically in the class rooms of GIK. For this purpose, we sifted through the available resources and collected a set of most useful teaching and learning strategies which will be discussed in this report.

C. Teaching and learning are viewed very simplistically even by teachers

Ask anyone (including teachers) about what learning means and how students learn, and you will get a set of very simplistic responses such as:

1. **Simplistic response-1:** Teaching is about the teacher filling the empty heads of students with information. This view is refuted by research which says that there is no empty head to be filled with information. Student's head is already loaded with information before they enter the class room. This information load is the sum total of learning which student acquired in all kinds of learning environment (formal and informal) before entering the class. This is called Prior Knowledge (PK) or background knowledge and is believed to have great influence on further learning.
2. **Simplistic response-2:** Information received by learner for learning in the class room directly goes to the part of the brain called long term memory and stored there. This view is also rejected by research. Expert tells us that information, as received, initially does not make sense to the learner. He/she has to process it in the working memory (WM) for sense making before it is stored in the long-term memory (LTM). The learner is essentially trying to make sense of the information using his WM and LTM. This "sense making" in the WM and LTM transforms

the information into meaningful chunks which is later recalled and retrieved for use as and when needed.

- 3. Simplistic response-3:** Learning is viewed as one-way flow of information from the environment which go into the brain from the learning environment into the LTM. If this is the case, then what are recall and retrieval of information from LTM good for? Research has shown that recall and retrieval of information from the LTM is the flow of information which is coming out from LTM to the outside world. This recall and retrieval of information from LTM is as important for learning as taking information into the brain. No retrieval, no learning.

D. Class room is like a black box and to find out what happens inside it in terms of interaction between teachers and learners, teachers should make sure that:

1. They know their subject they teach and the enabling subjects he needs
2. They know how to engage the learner
3. They explicitly teach students how to learn for *retention that sticks*
4. They assess impact of their teaching on students learning when the class is over
5. They diagnose learner's prior knowledge (conceptual stock) in LTM before they lecture. Cumulative deficit in terms of knowledge gaps and misperceptions that students bring into the class room are hurdles for understanding and must be remedied
6. They realize that they can teach well but it does not mean that students have learnt anything.
7. They realize that students Working Memory can be overloaded **during lecture**
8. They know that they can improve their teaching by asking feedback from students, faculty, reflection and metacognition, making videos of their teaching, writing their teaching philosophy, base their teaching on a sound theory such as constructivism and cognitive load theory: no home-spun techniques work
9. They see learning from the eyes of the learner: can empathize
10. They see quality of students work as feedback on their performance (not to blame students)
11. They pursue teaching as a scholarly activity and field of action reserch
12. They use assessment / exams as opportunities for enhancing learning of students
13. They do everything possible to hone their English and Math skills
14. They focus on understanding rather than covering the syllabus
15. They demonstrate that they are lifelong learners

E. Learners cannot learn unless they are engaged in what is being taught

Most teachers are not trained for teaching and, as such, they do not use strategies which are most effective for engaging learners in what they teach in the classroom. Engagement of learner is of essence in the profession of teaching. No engagement, no learning. Most teachers teach as they were taught when they were students. Some of them add a couple of home-spun strategies. Experts in the field of education have discovered and tested a variety of teaching strategies which are useful for engaging learners. If used properly these strategies will go a long way in enhancing learning and inspiring both the teacher and learner.

Similarly, most students are not trained how to learn for durable retention that sticks and which they would not forget so easily. Students are amateur learners and they use learning strategies which are mostly “learn and forget” loops. Ironically, teachers usually don’t teach their students learning strategies which are most useful for durable retention of learning. If such strategies are explicitly taught, students’ learning will be more efficient and pleasurable.

F. Teaching Strategies effective for engaging learner and enhancing learning that sticks:

- a. Peer teaching and learning (group discussion)
- b. Flipped class rooms
- c. Problem based, discover, inquire based, learn by doing.
- d. Teaching using Formative assessment for regulating learning
- e. Teaching strategy to train students for autonomous learning

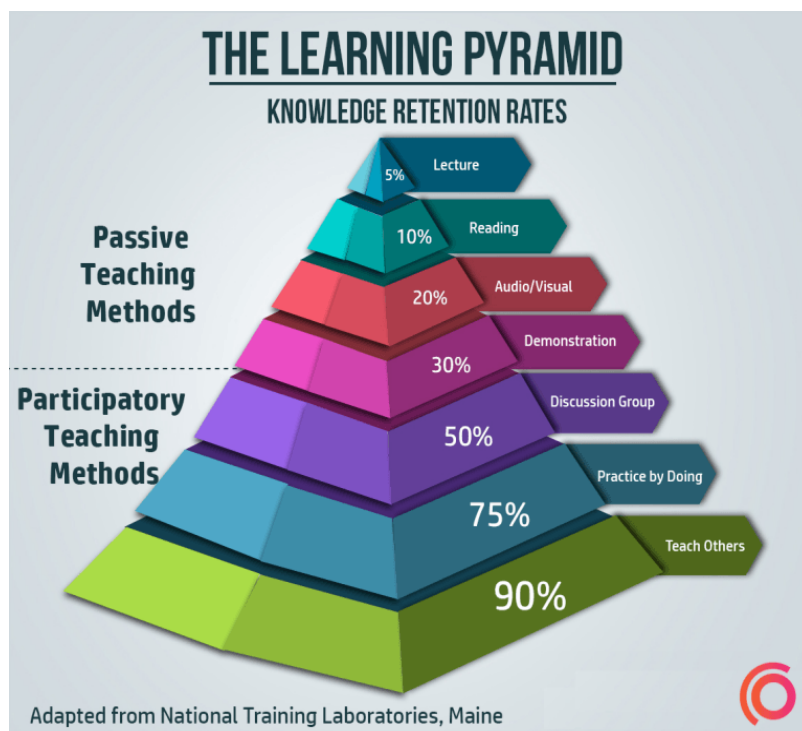

G. Learning strategies most effective for durable retention (Learning that sticks):

Retrieval practice, Spacing learning sessions, Interleaving practice, Elaboration

<http://www.learningscientists.org/posters/mentions> mentions strategies which are useful for retention

The relative effectiveness of different methods of instructions and learning are usually illustrated by “The Learning Pyramid” given on the right. It can be seen from this triangle that only 5% of what you hear in the lecture can be retained by the learner.

H. **Teacher should try to rationalize “What strategy works for learning and what does not” in the class room. For this purpose, he/she needs a sound theory (model) of how humans learn. Without it he/she is practicing black art. A simple model of Information processing and learning is described below. Details are given in the internet.**

To understand how we learn, let us start with a simple example. You see a picture and recognize it as that of your mother. This recognition means that the picture now makes sense to you. But how did you come to this sensing and recognizing? Our model of how learning occurs assumes that the picture initially is held in the working Memory (WM) for about 20 seconds for processing. This processing proceeds as follows: For the purpose of recognition, WM on receiving and holding the visual signal of the picture, goes to LTM and retrieves prior knowledge from there relevant to the

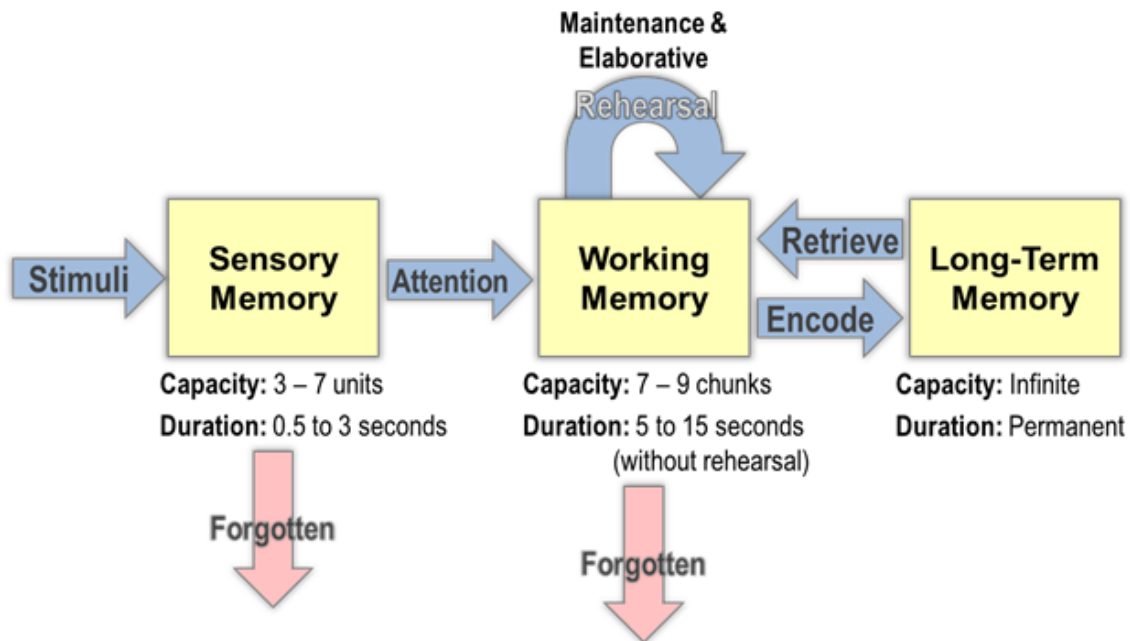

picture of your mother which has already been stored in LTM from previous experience. Interaction between the visual sense of the picture held in WM and the PK retrieved from LTM takes place in the Working memory (WM). It is, as a result of this interaction in WM between the visual information from the outside and the retrieved PK from inside, that enable you to recognize the picture.

The above explanation holds for every bit of information that we receive from the environment for learning. Once information is processed for sense making in the WM it is transferred to LTM for storage. This is how PK builds in LTM, stored there and at some point, later retrieved for use as and when it is needed to solve a problem. One must notice that parts of PK are connected to each other in networks in the form of chunks. As a result, the number of information decreases, and the sizes of chunks grow.

Notice please that we recall information from LTM to make sense of the new incoming information. Experts say that you have not learnt a piece of information if you cannot recall it for use such as for recognizing the picture of your mother. This implies that our PK is a useful tool which we use all the time to learn more and more. Let us repeat what was just said about rationalizing learning:

- a. The learner has long term memory (LTM) where previous learning is stored as PK (thus no empty head exists). Information assimilated
- b. and stored as prior knowledge (PK) in chunks in long term memory (LTM) which will sooner or later be recalled and retrieved and put to use to solve problem such as recognizing the picture of your mother (it started as a problem and you solved it when you recognized it).
- c. Learner holds incoming new information to be learnt in WM for a few seconds (20 sec).
- d. Learner while holding the new information from outside in WM retrieves PK from LTM and interaction takes place in WM for sense making.
- e. It is interesting to note that learning involves both the information from the outside environment and those from the inside as retrieval from LTM. So, retrieval is an integral part of the learning process. Unfortunately, learners (and for that matter their teacher don't know about the role retrieval plays in the process of learning).
- f. The purpose of processing information in WM is sense making of the raw information

The schematic given below describes how information to be learnt are processed by learners

I. Importance of prior knowledge and knowledge chunking in the learning process

As mentioned above retrieval of information is an integral act in the process of learning. It has been found that frequent retrieval of information from LTM strengthens the memory trace of the learner and the continuous practice of retrieval of information makes retrieval sufficiently automatic. This means the learner can retrieve information from LTM without spending significant conscious efforts. An example is speaking, listening, writing and reading one's mother tongue (All the four functions of listening, speaking, reading, and writing involve recalling and retrieving PK from LTM). As a matter of fact, when we listen, speak, read, and write we constantly recall and retrieve our mother tongue from LTM. Since we have been practicing this recall and retrieval of our mother tongue repeatedly, further recall has become automatic and we require little efforts in using our mother tongue. As soon as we switch from mother tongue to a second language such as English we require a lot of efforts to recall and retrieve information from LTM related to the English language. As a result, learning becomes difficult because we have to make extra efforts to process English language in WM.

One skill which learner develops through practicing and which is very useful for facilitating learning is the chunking of knowledge. Examples are: letters such as A, B, C are bits of information which are chunked into words; words are chunked into sentences; sentences are chunked into paragraphs and so on. Even the "concept of punctuation" is a chunk. Chunking reduces the number of information to be processed in WM and makes it more efficient. Recalling chunks of information is much easier and it reduces load on the WM.

J. The teacher must diagnose prior knowledge (PK) of students before the start of a new unit of study. Teacher will identify knowledge gaps and misperceptions and take remedial steps

Students entering a class room already have their brain filled not only with knowledge of the subject matter which they have experienced in earlier classes but with information which they collect and store in their memory formally and informally from a variety of sources. This background knowledge (prior knowledge) means that students 'head is not an empty vessel to be filled with facts. It has been found that PK is the most important factor affecting new learning. It is therefore required of the teacher to diagnose this background knowledge (prior knowledge, PK) before starting to teach a new unit of study. This diagnostic should help in finding out knowledge gaps, inaccuracies, misperceptions, naïve theories, beliefs, and the overall level of knowledge of the learner. Once this information is obtained the teacher can start teaching the student where he/she stands academically. As a result of this exercise, the teacher may conclude that the students are so weak as to be unteachable. But the teacher should accept students as they are, not as they should be. Prior knowledge is believed to be the most important factor affecting learning.

K. Theories (models) of learning and their impact on improving teaching

As we know that faculty involved in research is guided by sound theories without which no one will ever be able to pursue academic activity. However, when it comes to teaching this simple fact is ignored: Teaching is not informed by any theory. Teachers are guided by their experience of how they were taught when they were students. Some of them may add a bunch of home-spun strategies but they are mostly not rationalized in the context of any theory. It must be pointed out that teaching is a scholarly activity and it cannot be pursued without guidance from sound learning theories. Fortunately, many learning theories have been developed for this purpose and here we will mention two most popular ones: Constructivism and Cognitive Load Theory. They are discussed in the internet.

L. We are overly concerned about what goes in as inputs into the class room and least bothered about the output in terms of the experience of the learner

Certain inputs from the outside -- pupils, teachers, other resources, management rules and requirements, parental anxieties, standards, tests with high stakes, and so on are fed into the box. Some outputs are supposed to follow: pupils who are more knowledgeable and competent, better test results, teachers who are reasonably satisfied, and so on. But what is happening inside the box?

The classroom should be regarded as a place where teachers learn how to teach and where students learn how to learn. Just as lawyers learn in the court room and doctors learn in the hospital, the classroom is the place where the teachers should be learning as long as they remain in this profession. Good teachers are those who have the habit of lifelong learning, not who teach well. The class room is like a learning clinic both for students and teachers where they identify learning related problems and design strategies to solve them. Educational institutions in the 21st century should be regarded as places where learning is produced unlike the past when they were considered places for providing instructions

M. Feedback to the teacher as driver of improving teaching performance:

Sources of feedback to the teacher are Fellow faculty sitting in the class room, students and teacher's own metacognition as well as videos of their teaching. Feedback to the teacher has been empirically established as the single biggest driver of improvement in learning

Peer review of teaching offers a powerful opportunity for colleagues to observe one another's teaching strategies and, where appropriate, to discuss ways to better align those practices with disciplinary and departmental goals. Unlike student or outside evaluation, peer review involves co-practitioners exploring their shared trade.

N. Measuring the Impact of teachers' teaching on students learning:

Most teachers are not skilled enough in engaging students in what they teach them in the class room. Teachers usually assume that students are learning from them. This assumption is vague and unfounded. Studies after studies have shown that learners are not engaged in what the teacher teaches for most of the time! Psychologists have found that keeping the audience engaged for more than fifteen minutes is a herculean task. The teacher can teach and teach it well but it does not guarantee that students are learning. You can check students' engagement right in the middle of your teaching session: Stop teaching and switch to asking questions of the students while walking between aisles. The silence of most students and the poor response from some of them clearly show that they were not engaged in learning. This shows how mistaken teachers are in assuming that students pay attention and are engaged in learning. Good teachers constantly struggle and test a variety of strategies to engage learners. The teacher has to design teaching strategies which are most useful for bringing learners onboard and trap them for learning. He is supposed to be engineering the class room interaction for this purpose.

Most teachers don't pay attention to assessing and measuring the impact of their teaching on students' learning during and after the class in real time. Impact measurement greatly helps teachers to regulate students' learning and this fact is worth noticing. Measuring such impact sets the direction for achieving the intended learning outcomes and inform learners about their progress in learning. It is obvious that without such measurement teachers and students cannot evaluate the extent and direction of progress in learning. For the purpose of this measurement teachers can increase the number of questions they ask orally as well as in the form of short quizzes, encourage students to participate and ask questions, encourage peer interaction among students, invite colleagues into their class for getting feedback, arrange brainstorming session on students learning at the faculty and Institute level, reflect on what they do and how they do it in the class, participate in continuing professional development, get frequent feedback from students.

M. Evaluating and assessing students' learning and its purpose:

Two major concerns:

1. Do teacher measure the impact of their teaching on students learning during and immediately after the class. If they don't teaching and learning will remain disconnected

2. Do teachers make assessment part of the enhancement of learning. This is an important goal and teachers should practice it because it regulates learning. Formative assessment is used to do it

Diagnostic Assessment:

Diagnostic assessment is carried out by the teacher to make sure that the learner is ready for the new unit of study. More specifically, the teacher wants to identify a deficiency in learning strategy the student has been using, knowledge gaps, misperceptions, and naïve theories in the prior knowledge of learner. The diagnostic assessment provides useful feedback from the student to the teacher about the academic level where the student stands and simultaneously informs the student of his/her weaknesses

Formative assessment (Getting Feedback to regulate learning):

Formative assessment is the frequent, interactive checking of student's progress and understanding. Its purpose is to identify learning needs and adjust teaching. It informs the teacher for immediate intervention and feedback. Formative assessment increases learner's motivation. Feedback generated from the assessment of students leaning to the instructor is the most powerful tool which teacher can use to adjust his teaching. Such a feedback can be obtained by formative assessment as the student proceeds forward.

It jogs learner's memory for metacognition and self-assessment. The learner is trained to avoid distractions. It is an assessment for learning, not of learning. Formative assessment facilitates the transfer of knowledge from WM to LTM.

Summative assessment (assessment of learning):

Summative assessment is carried out at the end of a unit of study. Its purpose is: To pass or fail a student, to grade or rank a student, to allow progress to further study, to assure suitability for work, to predict success in future study and work, to signal employability and selection for employment, to validate the achievement of the intended learning outcomes at the end of a unit of study. Summative assessment is an essential part of outcomes-based education and is required to assess learning against stated criteria.

The following are important points in assessment to be kept in mind:

1. Traditionally summative assessment is paid more attention compared to diagnostic and formative.
2. The biggest effect on student learning occurs when teachers become learners of their own teaching, and when students become their own teachers
3. It is a mistake to see feedback as something *teachers provide to students*. Feedback is most powerful when it is from the *student to the teacher*. When teachers seek or at least are open to, feedback from students as to what students know, what they understand, where they make errors, when they have misconceptions when they are not engaged, then teaching and learning can be synchronized and powerful.

4. Assessment will be most useful if it is made part of the learning process
5. Learning becomes more efficient when students study material and self-test themselves rather than to reread, summarize, or highlight notes or text. This is called the testing effect
6. World Bank Report - 2018 warns on “Learning Crisis in global education” and advises that “well-designed student assessments can help teachers guide students, improve system management, and focus society’s attention on learning. These measures can inform national policy choices, track progress, and shine a spotlight on children who are being left behind”.
7. **Assessment typically involves:** Examinations, quizzes, Term papers, Group projects, Class participation, Oral presentation, Course assignments etc.
8. Students fear and resist testing/assessment because they view it as an action which “exposes their weakness “. If they are assured that testing will facilitate them in their learning, they will accept it
9. Teacher should use Bloom Taxonomy (cognitive domain) to design questions for setting up the paper: knowledge, skills, and competence of the learner are probed at the following levels of Bloom Taxonomy:

Remembering, Understanding, Applying, Analyzing, Evaluating, Creating

10. Discourage the use of multiple-choice questions (MCQ) in assessing
11. Makes sure that the achievement of CLOs and the award of grades are strongly correlated.
12. Formulate probing questions for authentic evaluation and make sure the following three conditions are satisfied: Validity, Reliability, and Achievability.
13. Provide solution key of every exam paper to the students immediately after the exam is over and instructs them to come for discussion if they have questions.
14. Discuss with students and faculty members every question paper after the exam is over and seek feedback for improvement in future
15. Ask for feedback from the students regarding assessment quality, level, and their expectations.
16. Analyze the strengths and weaknesses of students’ performance on all exams and discuss it with them.
17. Transfer of learning to the new situation should be assessed
18. Assess promotion of respect for the core value of science such as:
 - Longing to know
 - Questioning everything
 - Collecting data and looking for patterns
 - Asking for verification and evidence
 - Respecting logic, Reasoning, critical thinking, diversity
 - Appreciates the tentative nature of knowledge
 - Consideration of context, paradigm, framework, tacit assumptions
 - Consideration of consequences (both intended & un-intended)

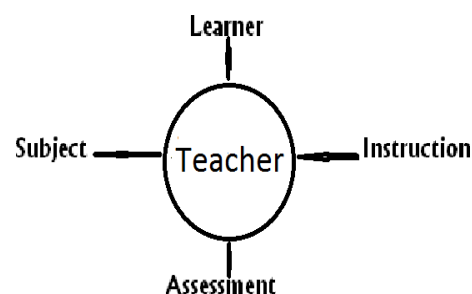

- Teacher teach students how to learn for retention: If students are good at retention, they will be better off as they graduate from class to class

Teacher as a person, as a scholar, and as a lifelong learner

The cross on the right shows a teacher at the epicenter and we define him/her as a good teacher not because he/she teaches better, but he/she learns better

As shown in the cross, the teacher navigates in four-dimensional space learning about his subject, about the instruction strategy he is using, about the method and purpose of assessment, and last, but not the least about the characteristics of the learner.

This means he/she learns more and more about the characteristics of all the four and there is no limit to it. He has to develop a habit of lifelong learning to be successful.

Good teacher exhibits, among other things, the following personal and academic characteristics:

1. Personal Characteristics improving the connection with students

Passionate about teaching, Caring,

Showing empathy, Respectful, Approachable, Engaging, Organized, Responsive, Collaborative, Fair, Credible, admits his mistakes, Good sense of Humor, Graceful, Good Listener, not obscurantist, not temperamental, Not vindictive, Avoids using abusive language, Not forgetful.

2. Academic characteristics influencing the performance of teachers

There is no substitute for autonomous lifelong learning and teacher is supposed to be an autonomous a lifelong learner. The teacher can improve his teaching skills by reading results of research in education where useful insights into teaching are reported.

Experts such as Psychologists, Sociologists, Anthropologists, Evolutionary Biologists, Linguists, Educationists, Neuroscientists, Philosophers, Learning Theorists, knowledge theorists (Epistemologists) have been trying hard to understand the process of learning i.e how people learn and how the brain works. Significant insights have been discovered which are very useful for understanding the process of learning and which have been successfully used in the class room to enhance learning. There seems to be a gulf between research in education and teaching. It is time for us to benefit from the results of research in education and incorporate empirical evidence and sound theory in our teaching practices.

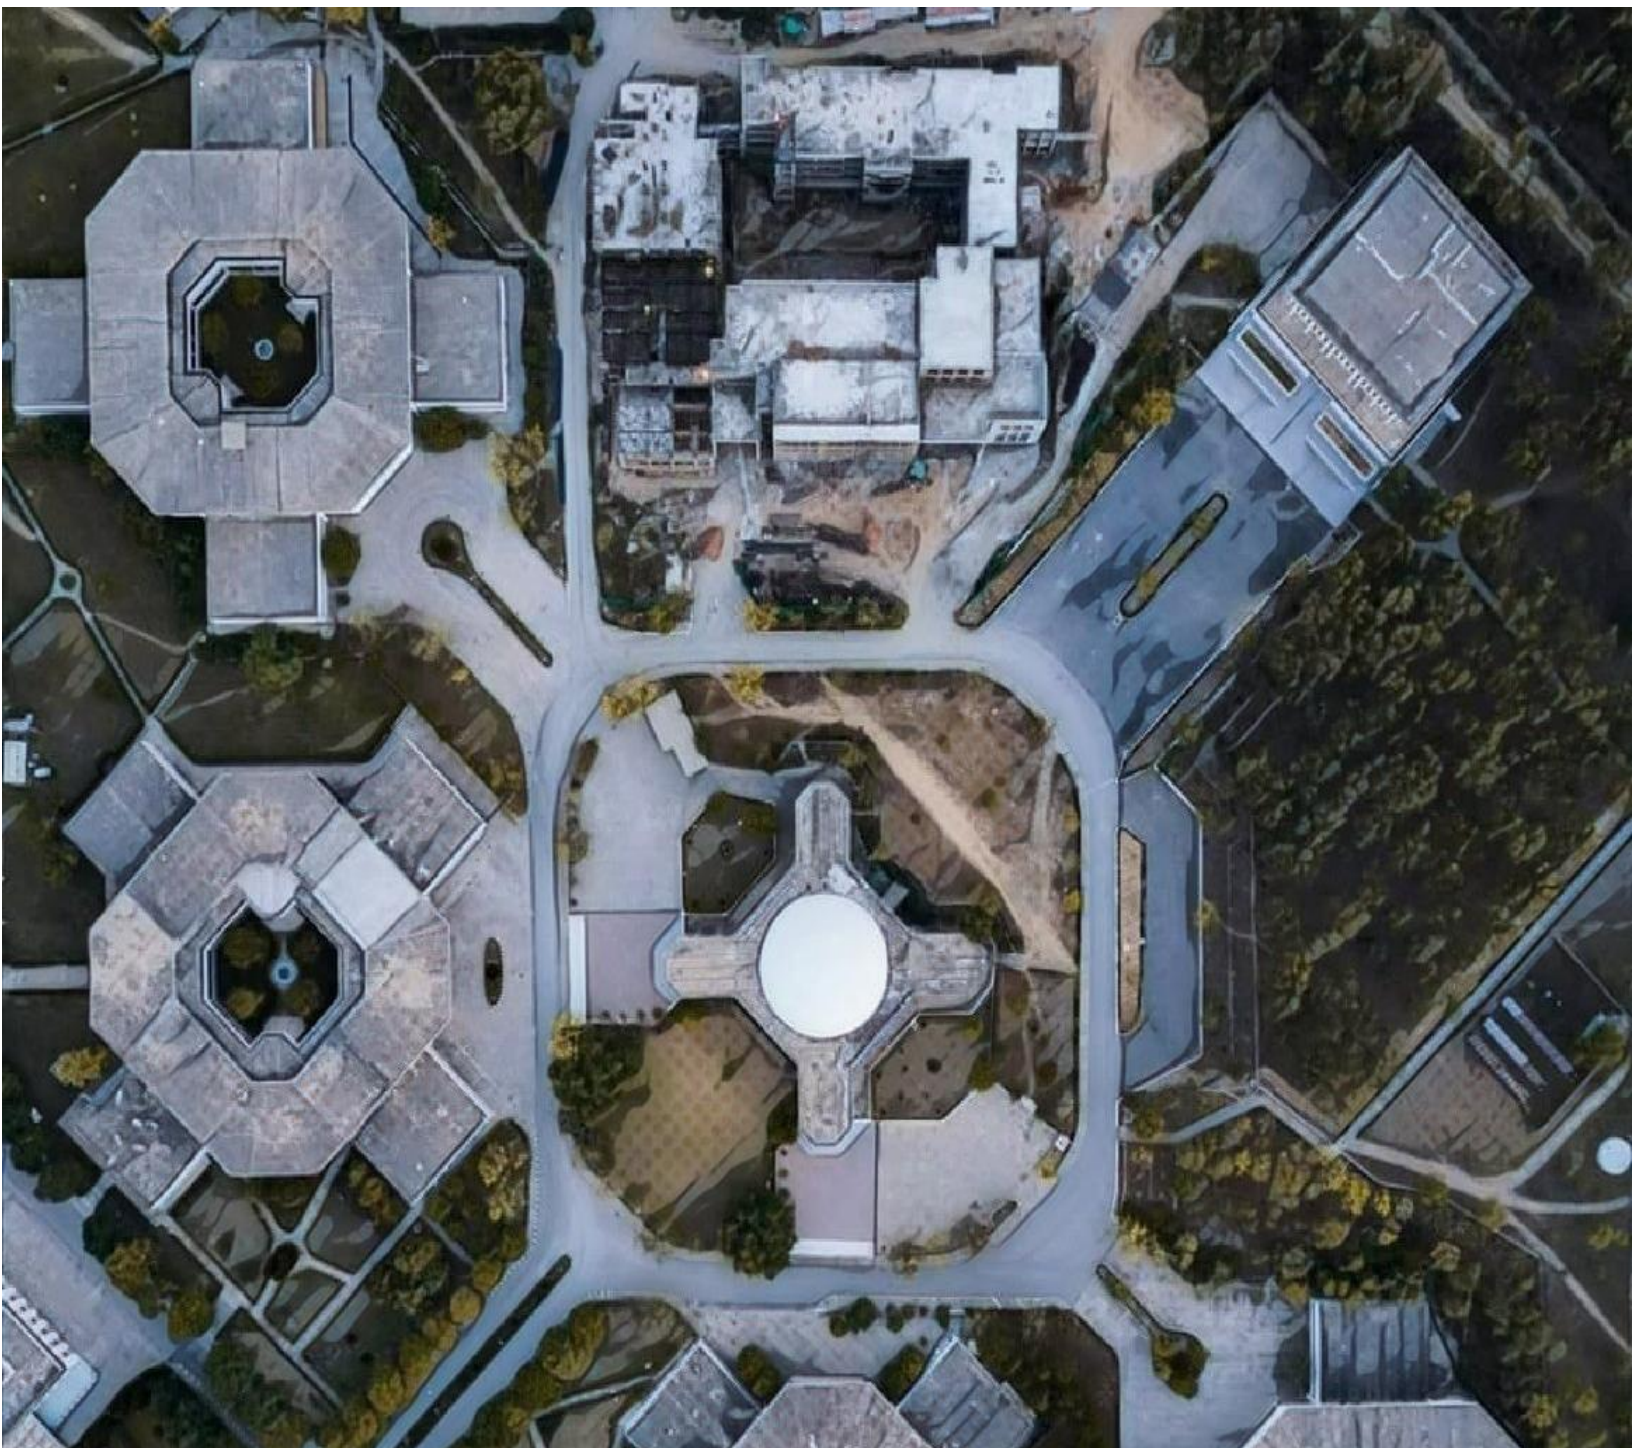

Conclusion

It must be admitted that the faculty of GIK is already doing a good job in terms of teaching. However, as someone has said “good is the enemy of great”. And great teaching will be missed if

one becomes complacent. This report expects faculty not to be complacent and strive to practice great teaching. We close this conclusion by noticing that:

1. Learning is a change in the prior knowledge (PK) which is stored in the long-term memory (LTM).
2. Teacher identifies and helps in solving freshmen problems which are unique to them and which arise because of freshmen' transition from college to university.
3. Learning opportunities outside the class room have increased and teachers should use these opportunities for the benefit of students
4. Learn English, Math, and be functional in using technology in education
5. Be digitally fluent in the use of educational technology to deliver the curriculum.
6. Don't teach as you were taught
7. The teacher should encourage peer teaching and learn in the class (group work).
8. The teacher should believe that all students can learn provided they are provided motivation, respected, allowed to express their understanding, cognitively challenged, taught effective learning skills for retention and trained in terms of grit and perseverance.
9. The teacher should share up to 40 - 50% of the class time with students so that the later can express their version of understanding of the subject matter under discussion. They should be allowed time to figure out answers to questions.
10. The teacher should be prepared to share authority with students in the class room and should exhibit humility
11. Teach students how to read books
12. Teachers should explicitly explain to students what they expect of them
13. Encourage students to learn for understanding and not for the test
14. Informs students of the artificial silos between disciplines and encourages them to involve themselves in interdisciplinary subjects.
15. The teacher should be prepared to share authority and responsibility with students in the class room and should not be snobbish and should exhibit humility.
16. The teacher should encourage peer teaching and learn in the class.
17. The teacher should align instructions and assessments with intended learning outcomes
18. Writes clear course learning outcomes, align them with program learning outcomes and shares them with students and colleagues
19. Teachers should make their teaching relevant to the world of work.
20. Be aware of the rising role of market forces in the education industry.
21. Actively searches for strategies to manage large classes.
22. Learns a variety of instructional strategies for reaching out to all students.
23. Learns how to adjust the rigor, depth, and breadth of curricula.
24. Try to be a resource person in teacher training workshops, not just a participant
25. Try to write books, design curricula

26. Discover mental Models, use tables, flow charts, concept maps, graphs, Cartoons, pictures, concrete examples and non-examples, metaphors, jokes, analogies, stories, mnemonics, demonstrations, videos, diagram, body language,
27. Gives examples, non-examples, metaphor and use multiple contexts to explain difficult concepts. This practice can be used to teach large classes with students of mixed abilities such as freshmen at GIK Institute.
28. Teachers should use the classroom as their learning clinic where they diagnose prior knowledge of students for misperceptions, naïve theories and knowledge gaps which students bring with them into the class room
29. Declares, explain and justify his/her teaching philosophy to the students and faculty. Bases his/her teaching on a sound learning theory such as constructivism and cognitive load theory
30. States explicitly to everyone that he/she is open to learning from students and faculty.
31. Identifies effective teaching strategies and utilize it to produce learning.
32. Identifies learning strategies which are useful for durable retention of learning and recommends such strategies to his/her students.
33. Invites colleagues to his/her class and sit also in classes of his/her colleagues for sharing experience and providing feedback to each other
34. Bases his/her teaching on a sound learning theory such as constructivism and cognitive load theory and rationalize his instructional strategy
35. Designs learning environment in the class room which is engaging for the learners thus minimizing the influence of distractions.
36. Provides stress free conditions while giving exams to his/her students.
37. Provides immediate and thoughtful feedback on students' work.
38. GIK has no master trainers for training faculty for teaching. Cell should be opened
39. Teachers respond to how students react to their teaching
40. Primarily teacher should not focus on teaching the subject; he/she should focus on the transformation of the learner
